Pre-Eminence

Pre-eminence is not achieved by words or claims. It is the reward of consistent and distinguished service. The slow, solid growth of years of outstanding accomplishment. Pre-eminence demands more than originality; solid, dependable Quality is a factor, too. In more than seventeen years of merchandising history, Bowie's has never faltered in insistence on quality, not to sell at a price but primarily to give value first. By strictly adhering to the ideal of its founder—that is why Bowie's can justly claim pre-eminence to-day.
