FRIDAY AND SATURDAY, OCTOBER 29th and 30th
 Franchot Tone, Maureen O'Sullivan and Virginia Bruce in
"BETWEEN TWO WOMEN"
 Also SCRAPPY'S BOY SCOUTS (CARTOON)

MONDAY AND TUESDAY, NOVEMBER 1ST AND 2ND
 Preview Sunday, October 31—JOE E. BROWN, FLORENCE RICE
 AND GUY KIBBEE IN
"RIDING ON AIR"
 and LOUIS HAYWARD AND JANE WYATT IN
"LUCKIEST GIRL IN THE WORLD"

WEDNESDAY AND THURSDAY, NOVEMBER 3RD AND 4TH
 DICK POWELL, MADELINE CARROLL AND ALICE FAYE IN
"ON THE AVENUE"
 Also—COMEDY
"NO PLACE LIKE HOME"

FRIDAY AND SATURDAY, NOVEMBER 5TH AND 6TH
 CHARLES RUGGLES AND ALICE BRADY IN
"MIND YOUR OWN BUSINESS"
 Also: NEWSBOYS NOCTURNE (BROADWAY BREVITY)

Dutch Doctor Questions Value of Tooth-Brushing

(By J. W. S. McCullough, M.D., D.P.H.)
 Doctor J. Bol, of the City of Utrecht, Holland, has published the results of his investigation into the value or otherwise of tooth-brushing in the prevention of tooth decay. He examined groups of men, mostly soldiers of about the same ages (19-29) and of similar physical condition and who came from all parts of Holland. One group of 103 men had never used tooth-brush or tooth-paste; another, 130 men, had used brushes and paste since childhood or at least since their 14th year; while a third group, 98 men, had begun to clean their teeth later in life. The non-decayed

teeth were counted in each mouth; the criteria of freedom from caries were the absence of fillings, of cavities and the absence of unusual tenderness at the neck of the tooth.
 This investigation discloses the remarkable similarity of conditions in all three groups. In the first group, namely those who had never used a tooth brush, the average number of sound teeth remaining (average age 22.49 years) was 21.47. In the second group with brushing in childhood or at least from the 14th year, the number of sound teeth remaining (average age 20.97 years) was 20.90. In the third group, who had begun the cleaning of the teeth later in life, the number of sound teeth (average age 20.91) was 21.57.
 Another remarkable circumstance was disclosed. The first group, as might have been expected, came from the poorest classes and had seven times the number of hypoplastic (defective or ill-formed) teeth found in the second group. So far as it goes this fact tends to upset the theory of Mrs. Mellanby who claims to have demonstrated a direct association between tooth structure and tooth decay.
 Dr. Bol's report shows that mouth hygiene as practised in Holland is of no value in the prevention of caries. Moreover the tooth-brushes cannot readily be kept clean; this article is a fruitful cause of germ retraction and the use of soap and soap-containing tooth-pastes is one of the commonest causes of decay of the necks of teeth. One judges that the doctor will not be over-popular among the tooth-brush and tooth-paste manufacturers of his native country.

At Thursday night's meeting of the directorate the resolution committee was asked to include a resolution along these lines among those to be sent to the annual meeting of the Ontario body at Toronto next month.
 About six months ago the board here passed a resolution urging the establishment of such a park and the Ontario Associated Boards of Trade will be requested to endorse it.
 Secretary E. L. Banner brought the matter before the directorate and said that such a park would prove a great attraction to tourists who are anxious to see wild animals. He stated that the board each year receives numerous letters from tourists who want to know if they will be able to see wild game when they visit this section of the province.

Birthday Party at Schumacher Friday

Other Items of News from Schumacher This Week.

Schumacher, October 27. (Special to The Advance.)
 Mr. Fred Dwyer returned Saturday from a vacation in Toronto and Niagara.
 Born.—Thursday, October 14th, 1937, to Mr. and Mrs. Rosita, 180 Second Avenue—a son.
 Mr. and Mrs. John Griffiths left on Thursday for a vacation in Montreal.
 The Child Welfare Clinic will be held in the public school on Friday afternoon, October 29, from 3 to 5.
 Mr. T. Roberts returned Sunday from a vacation in Toronto.
 Mrs. J. V. Angrignon and family are having high memorial mass on Wednesday morning, Nov. 3rd, at seven-thirty, in St. Alphonsus church, in memory of Mr. J. N. Angrignon, who passed away in 1918.
 Messrs. R. Heath and W. Small returned Thursday from a hunting trip to Moosonee, where they report the shooting very good. Geese and ducks reported very plentiful.
 Mr. J. R. Todd has moved his drug store from his old premises to the Korson building, next the new Post Office.
 Mrs. Raycroft and son, Clarence, were in town over the week-end for the funeral of the late Mr. Frank Miller, of Timmins.
 The W. A. of Trinity United church are holding a rummage sale in the church hall on Saturday morning, Oct. 30th, at nine o'clock.
 Messrs. Dick Elley, Joe Richards, Bob Trollope and Clifford Grist left Saturday for a hunting trip.
 Mr. Langley is a patient in St. Mary's hospital this week.
 Miss Nancy Hepplewhite entertained at a birthday party on Friday evening in honour of Olive Miller, who celebrated her sixteenth birthday. About twenty friends and classmates were present and the evening was spent playing games. Olive received some nice gifts from the girls. Refreshments were served by the hostess.
 Mr. and Mrs. C. McGee returned Sunday from Chapleau where they had taken the remains of Mrs. McGee's mother, Mrs. McAdam, for burial.
 Joe Amm left last week for a vacation at his home in Quyon, Que.

Big Companies in the Kenora Gold District

Kenora, Oct. 23 (Special).—Although the staking rush taking place on the Manitoba-Ontario boundary line is little more than a flurry, it is nevertheless attracting a number of large Canadian mining groups, including Hollinger, Karl Springer Exploration, Madsen Red Lake, Springer Sturgeon and Winnipeg interests. Such is the information given to The Globe and Mail by Charles Taylor, manager of Oliver Severn Gold Mines, the company which started all the excitement.
 The claims held by Oliver Severn were re-staked by a group of Kenora men this summer after the ground, originally taken up in 1898, was allowed to lapse. Since work was started little over a month ago, vein has been traced for a distance of 350 feet to a point where it dips into Falcon Lake, and it was picked up again on an island 450 feet from the shore. Sampling has given average values of \$15 across four feet, in some places across 6 feet, for the full 350 feet.
 Diamond drilling contract has been let to Boyle Brothers for a minimum of 3,000 feet, series of short holes to be drilled to depths of 150 feet. Should results stand up, contract will be extended for another 2,000 feet and holes put down to 350 feet. Drilling rig has arrived at Falcon Lake and work should be under way shortly.
 On surrounding properties a small crew in charge of George Gibson is doing work on claims staked by Hollinger, adjoining Oliver Severn on the east. Adjoining Hollinger on the east are the claims staked by Springer Exploration and Springer Sturgeon, and prospecting crews are now at work. Madsen Red Lake has just staked its property and crew is starting work under F. Smith, Madsen engineer.
 In all more than seventy-five claims have already been recorded, most of them, including the Hollinger and Springer groups, being on the Ontario side of the boundary. Oliver Severn ground is half a mile inside the line in Manitoba.

Noises at Night Bother Val D'Or News Editor

(From Val D'Or News)
 "Have you ever seen a dream walking," used to be one of the lines of a popular sentimental song. We've never seen a dream walking, but on Tuesday night, or was it Wednesday morning we wakened to see that flashy yellow runabout of the Colonial Construction rumberling its elephantine form down past our bedroom window, with the greatest snortings and at the same time giving us the "bird" as it started tearing up main street with all the delicacy of a rhinoceros manuring its own toenails (that is if rhinos have toenails). It continued snorting and giving us the "bird" all night, but by morning all was quiet on the main street front, except that there was a hole in front of the T. A. Apartments big enough to hide the missing front of the old Pioneer Store. It's all covered up now, and there's water running in that main, but it's somebody else's privilege further down the street to listen to "Snorting Susie" the galloping shovel.
 Acton Free Press.—If you never speak to people, they forget your existence. A similar result has happened to many stores, which never spoke to their townspeople by advertising.

Awe-inspiring

Bathers at the Baltic Sea resort of Teshow, on the German island of Rugen, were treated to one of nature's most awesome spectacles, the gigantic waterspout pictured here in a most unusual close-up. For eight minutes the twisting column of vapor linked clouds and ocean.

Youths Deny Story They Were Drowned

Search Party Finds Young Men Drying Themselves at Camp.

(From Northern News)
 Reports of a double drowning fatality early Saturday afternoon in the Blanche river near Larder Lake were found to be false when a search party from Kirkland Lake and Larder Lake found the two youths involved in the story drying out in a camp about a mile from the river.
 The two youths Ralph Erwin and Lloyd McGregor, received a thorough wetting when their canoe turned over in a rapid but the articles lost were two rifles. A small, brown, water spaniel disappeared. The dog was lost in the bush and not in the water. It would not follow a third member of the party home and up till today had not returned to Kirkland Lake.
 The three employees of Lake Shore mine had started out on a hunting trip after work Saturday morning. They travelled down the river, shooting the rapids as they came to them. At each rapid their companion, Elmer Craig, was put on shore with two expensive guns while the others took the canoe through the swift water.
 The rapids where the near-drowning took place was the third they encountered during the day. In the course of "shooting" it the canoe filled with water and struck a rock, throwing the two out. They made their way safely to shore, while Elmer Craig looked for a place to cross to help them.
 While he was gone, Erwin and McGregor attempted to salvage the canoe but failed to do so. Then they headed away from the spot to their car on the highway.
 In the meantime, Craig, not finding a spot to cross, came back on the opposite shore to where the canoe had been. Unable to find any trace of his companions, he immediately went to the highway, flagged a passing car, and reported the incident to police and mine officials.
 A party of seven or eight from Kirkland Lake, including D. L. Cramp, started out from here. They were accompanied by Constable McClelland of Larder Lake Provincial Police.
 Ralph Erwin and Lloyd McGregor, the objects of the search, had gone back to their car, expecting to find Elmer Craig waiting there for them. Unable to find him, they left a note telling where they had gone, and proceeded to a camp some distance away to get dry. The searching party missed the note but came to the camp to make inquiries.
 Neither one suffered any ill-effects from the adventure. Ralph Erwin had a few bruises, received when he was thrown against some rocks by the swirling water.
 "The water was certainly cold and we were in it about 20 minutes trying to get the canoe," said Lloyd McGregor, "but there was really no danger."
 The Blanche river is not deep at this point, but there is the danger of swift water.
 Before word was received here from Constable McClelland that the men were safe, Mrs. Erwin had been notified in Cobalt and immediately took the train for Kirkland Lake. She did not know her son was safe until she reached Kirkland Lake.
 McGregor and Craig were back at work Saturday night and Erwin on Sunday afternoon.

 Silver Collection at Door.

George Watts Meets Death by Accident

Old-Timer of Cobalt Struck by Car Near Larder Lake.

There was a time when everyone in the North knew George Watts, of Cobalt. He was one of the old-timers of the Silver Camp and also was well-known in all other mining camps of the North, paying frequent visits to other centres in the early days of the North, and being well-known as a prospector and mining man. Many read with regret his death through accident at Larder Lake recently. The Northern News, of Kirkland Lake, carried the most complete account of the death. The Northern News on Tuesday said:—
 "Yet another of that pioneer band who "made" the gold country passed over the Great Divide Saturday, when George Watts, 67, veteran of the Trail of '98, and ever since 1904 a prospector in Northern Ontario and other parts of Canada, was the victim of an automobile fatality on the highway just outside of Larder Lake.
 "A native of Parry Sound, Watts, whose funeral took place this afternoon, his bearers men who like him knew canoe and sled, handstee and maul, was at one time a great boxer, and travelled a western circuit as lightweight champion. On one occasion, in Winnipeg, he fought for a prize suspended above the ring—\$4,000 in assorted bills pendant by a string. He won it.
 "He made—and spent two or three small fortunes, and to the last lived the friendly, carefree life of his ilk, with ever another find round the corner.
 "For some years he was in the service of Consolidated Smelters, and by plane and the old means of transport travelled all over the T. & N. O. country, north of Rainy River, and into Slave and Great Bear Lakes, and the Manitoba field. At Lake Saint Joe, north of Sioux Lookout, he located a

Old-Timer of Cobalt Struck by Car Near Larder Lake.

There was a time when everyone in the North knew George Watts, of Cobalt. He was one of the old-timers of the Silver Camp and also was well-known in all other mining camps of the North, paying frequent visits to other centres in the early days of the North, and being well-known as a prospector and mining man. Many read with regret his death through accident at Larder Lake recently. The Northern News, of Kirkland Lake, carried the most complete account of the death. The Northern News on Tuesday said:—
 "Yet another of that pioneer band who "made" the gold country passed over the Great Divide Saturday, when George Watts, 67, veteran of the Trail of '98, and ever since 1904 a prospector in Northern Ontario and other parts of Canada, was the victim of an automobile fatality on the highway just outside of Larder Lake.
 "A native of Parry Sound, Watts, whose funeral took place this afternoon, his bearers men who like him knew canoe and sled, handstee and maul, was at one time a great boxer, and travelled a western circuit as lightweight champion. On one occasion, in Winnipeg, he fought for a prize suspended above the ring—\$4,000 in assorted bills pendant by a string. He won it.
 "He made—and spent two or three small fortunes, and to the last lived the friendly, carefree life of his ilk, with ever another find round the corner.
 "For some years he was in the service of Consolidated Smelters, and by plane and the old means of transport travelled all over the T. & N. O. country, north of Rainy River, and into Slave and Great Bear Lakes, and the Manitoba field. At Lake Saint Joe, north of Sioux Lookout, he located a

One of the Brown Family Sought at Latchford

The Latchford police are looking for one of the Browns and there are a lot of them. It doesn't help so much that it is William Brown that the police desire to find, as there are also a lot of William Browns. The particular William Brown sought, however, was working recently at road camps south of Latchford, and there were not so many William Browns there to make it too difficult for the police to get their man, if they really go after him. The call has gone out in any case for this William Brown, there being a bench warrant for his arrest. The charge against him was that of having liquor illegally. When his name was called in police court on Saturday last not a one of the William Browns was there to answer. Police suspected that he had slipped away from this land of sin and iniquity and had sought some other place where there may be more law-breaking but not so many police court cases.
