

Scollard Hall Will Meet Timmins Seniors Here Saturday

Play Sudden-Death Game in School Rugby Semi-Finals

Winners Will Meet Cobalt for N. O. S. S. A. Championship. Timmins Team at Top Strength for Season's Most Important Game With Clever North Bay College Squad.

Fresh from a decisive victory over Sturgeon Falls, whom they eliminated for the southern group honours, Scollard Hall, of North Bay, will meet Timmins High and Vocational School here on Saturday in a sudden death semi-final of the senior N.O.S.S.A. rugby series. The winner of this engagement will meet Cobalt, central group winners, who were given a bye into the finals.

Following their decisive victory over Kirkland Lake here last Saturday by a score of 26-0, which gave them the northern group by a round score of 30-1, Timmins students are expected to give the highly touted Scollard clan a bitter battle. The local squad is improving every time out and many of the big crowd that saw them in action last week are convinced that they can take Scollard, provided the breaks are with them.

With Ron Lake, backfield star of the local team, kicking to perfection and the remainder of the team playing the brand of football that will give any team in the same class the sternest type of opposition, fans can be sure that Saturday's battle will be a stand-out.

Coach John Grabb has been sending the team through stiff workouts every day this week and without any injuries to contend with, the squad will be at full strength for Saturday's deciding game.

Observers are certain that the winner of the Timmins-Scollard series will have little difficulty in taking the Cobalt crew for the championship.

Golf Club House to Close This Week-end

Golfers Asked to Remove Clubs and Other Effects from Club House.

Announcement is made that the Timmins Golf Club house will close this week-end for the season. Accordingly, all golfers are asked to take away all clubs and other equipment that they may have at the club house before the final closing this week-end.

A piece of sand paper pasted across the back of a picture at the bottom will help keep it straight on the wall.

Big Deer Shot Near Cobalt Last Week

Weighed 250 lbs., Killed at 250 Yards.

Kirkland Lake, Oct. 19.—Len Lundberg, owner of Len's Service Station on Prospect Avenue, needed only one shot to bring down a 250 pound deer. When on a hunting trip just south of Cobalt on Saturday morning.

Taking aim with his trusty 303 from 250 yards distance, Lundberg shot the buck through the heart, dropping it in its tracks. The deer, which Len proudly displayed yesterday morning before cutting it up and distributing venison to friends, was a perfect specimen with ten point antlers.

Lundberg and his party had entered the bush only 20 minutes before the deer was sighted. It was noticed about 500 yards away on a small hill. Getting to within 250 yards from the animal Len took aim and let fire, killing the buck instantly with a bullet through the heart.

It is one of the largest deer to be brought back to Kirkland Lake for some time. Lundberg stated that deer are plentiful in the Cobalt district this year.

Play Finals In Six-Man Rugby

Winners Declared in Intra-Mural Series at Schumacher High School.

Intra-mural six-man rugby finals were played in the Bantam and Junior divisions Tuesday afternoon on the Schumacher High School grounds. Much promising material has developed from the intra-mural games.

In the Bantam division the Imperials, coached by Narduzzi and Yorkie, opposed the Argonauts, handled by Arnot and Cripps. Bernie MacDonald half-back for the Argonauts proved too elusive for the Imperials. He crossed the line for two touchdowns as well as playing a strong defensive game. Kovich made many gains on end runs for the losers. The final score was Argonauts 11, Imperials 1.

In the Junior division, the Varsity squad by virtue of better teamwork were able to put the fleet-footed Buchar away for three touchdowns. The passing of Blenki and the defensive play of Wharton are worthy of mention. The passing and kicking of Narduzzi the end runs of Cowden, and the defensive work of Monk will deserve watching next year. The final score, Varsity 15, Queens 0.

ANNUAL MEETING OF THE TIMMINS CURLING CLUB

The annual meeting of the Timmins Curling Club will be held on Monday evening, Nov. 7. Members of the company who are unable for any reason to attend the annual meeting are asked to kindly sign and return the proxy forms, so that they may be represented at the meeting. There is also an invitation to associate members to be present at this annual meeting.

READY FOR SATURDAY'S BATTLE AGAINST SCOLLARD HALL

Shown above are four of the stars of the Timmins High and Vocational School senior rugby team, who will be seen in Saturday's game here against Scollard Hall in a sudden-death semi-final for the right to meet Cobalt for the N.O.S.S.A. championship. Scollard won the southern

group, Timmins the northern, with Cobalt getting a bye into the finals from the central section. The quartette above are, Bill Kossick, flying wing; E. McLellan, quarter; R. Johnston, left half and J. Baderski, right half. (Advance Photo and Engraving)

Refereeing To Be Stricter N.O.H.A. Secretary Warns

Interference With Conduct of Game by Managers and Coaches Not to be Tolerated, Says W. A. Thompson, of North Bay, During Visit to Porcupine, Yesterday.

W. A. Thompson, of North Bay, secretary of the Northern Ontario Hockey Association, on a combined business and hockey visit to the Porcupine yesterday, issued a general warning to all clubs in the circuit that during the forthcoming winter more stringent enforcement of the rules will be demanded from referees.

The complaint of the secretary had almost entirely to do with the all-too-prevalent practice in the past of managers and coaches rushing on to the ice to complain about decisions. "Right from the start this type of interference is going to be stopped and the league will back the officials to the limit," Mr. Thompson declared in the course of an interview with The Advance.

Any manager or coach who attempts to interfere in any way with the conduct of the game, will not only be asked to leave the players' box but will be taken, if necessary, under police escort to the dressing room. Formerly a manager or coach who was banned from the players' box would slip into the crowd nearby and direct his team from the sidelines.

There will be no attempt to curb, fast, rugged hockey but the rules of the game are going to be enforced to the letter the secretary declared.

The whole referee set-up will be dealt with at the annual meeting of the N. O. H. A. which takes place in North Bay on Saturday, November 5th.

During his visit here Mr. Thompson met and conferred with several of the managers of the senior teams. Tentative plans for the coming season were discussed and a number of points were raised that will be brought up for discussion at the annual meeting.

With the dropping out of Wright-Hargreaves from the southern group of the Gold Belt, leaving only Lake Shore, Toburn and Noranda in the contention, it has been rumored that Dome are contemplating entering a team in the Kirkland Lake group as well as the local group with Hollinger, Contarum, Pamour, McIntyre and Buffalo-Ankerite.

Managers of clubs in the Porcupine are maintaining a studied silence with regard to personnel of their prospective teams but from the number of applications for transfers that have been received by secretary Thompson, fans here can look forward to the best season for hockey in years.

Building New Fish Hatchery at Charlton

Interesting Sidelights on Some Features of Plans

Charlton, Oct. 20.—Favoured with excellent fall weather conditions, rapid progress is being made on the fish hatchery project which the provincial Department of Game and Fisheries is establishing in Bryce township, seven miles south of this Temiskaming district town, and which, when completed in the course of next year, will act as a distributing centre for the T. & N. O. section of Ontario. Much of the work, which was started only three weeks ago, will have been completed before winter sets in, the contractor, D. A. McLeod, Gengarry man whose headquarters are at Kingston, said, but the hatchery building and staff residence will likely be left over until 1939.

Location of the plant, on the farm of Wilfred Hill, at Hill's Lake, is considered ideal for the purpose of raising young trout. The lake, fed by springs only in which the water remains at an approximate temperature of 42 degrees, was tested out in an experiment undertaken by the Department before final decision on a site was made. A series of boxes was tied to posts in the lake and these, with the fish they held, were left for 42 days in the water. At the end of the six weeks' period, examination showed only one fish had died, and it had been caught in the wires of the box. The others were then released.

There will be four rearing ponds when the plant is complete, each 350 feet long by 60 feet wide, with the water four feet deep at the east end and increasing to six feet at the western extremity. These ponds will cover six acres of ground, their sides will be faced with gravel and there will be screened spillways at the west end of each. Water for the ponds and tanks will be brought from the upper part of the lake through a timber flume 1600 feet in length. In order to raise the level of the water ten feet, a concrete dam with sheet steel piling, 241 feet long and 14 feet high, will be built.

Fifteen open concrete tanks will be constructed at the hatchery, each of

them 50 feet in length, four feet wide and two feet deep. Capacity of the plant will be approximately 150,000 young fish, all trout, according to plans made. Work of clearing the ground of the scrub and second growth bush was commenced on September 27th, a steam shovel was put to work four days later and a pile driver swung into action this week in connection with the building of the dam. About 50 men are employed on the job, J. A. Good, superintendent for the contractor, said.

What Causes the Engine of Locomotive to Puff?

The puff-puff of a locomotive is familiar to all but few people seem to know just what causes the noise, according to operating officials of the Canadian National Railways. It is explained that a puff is the noise made by exhaust steam that is let out of the smoke-stack after the steam has pushed the piston along the length of the cylinder. One puff comes at the end of the forward stroke and another at the end of the backward stroke, four puffs to every revolution of the driving wheels.

Pushing the piston back forces out the steam that pushed the piston forward and as this used steam is still under some pressure, the operation of ejecting it through the smoke-stack is accompanied by noise, hence the puff. Engines puff louder when starting because a great deal of steam is admitted to the piston to gain maximum power. As the engine gathers speed "brute" power is not needed and less steam is admitted per piston stroke. The puff-puff then becomes a steady purr.

Expect King and Queen Will See Dionne Quintuplets

Word from North Bay is to the effect that it is expected that when the King and Queen visit Canada next year they will see the famous Dionne quintuplets. They may not stop at Callendar for this purpose, but if Their Majesties expressed a wish to see the famous five, means could be taken to gratify the wish.

Expect 1,000 to Attend Conference at Kirkland

It is expected that fully 1000 members of the teaching profession and leaders in educational matters will be present at the first regional conference of the Ontario Educational Association, to be held at Kirkland Lake, starting this evening, and continuing to-morrow. This conference is to take the place of the annual Teachers' Institute meeting formerly held in each inspectorate in the province. This year the experiment is made of holding a conference for a larger area of the country. If the plan works out well this year, it will likely be extended and continued as a permanent feature. With the success of these regional conferences, the day of the country or district gatherings of teachers each year for a convention will likely join the limbo of other forgotten or replaced things.

Important Change Made in School Sport Regulations

Players Taking Part in Two or More Games for Another Club to be Barred from Playing in Northern Ontario Interscholastic Sports, According to Ruling at North Bay Meeting.

In the future any athlete who plays two or more games for a club other than his school will not be allowed to perform for his alma mater in Northern Ontario interscholastic sport. This important regulation was passed by the Northern Ontario Secondary Schools Association at a meeting in North Bay.

As a result of the new rule, a hockey player attending a school, for instance, wouldn't be permitted to engage in the puck game for that school in interscholastic sport once he has performed in two or more tussles for a city league club or some other outfit outside the school.

Academic Rule

The regulation requiring students to make pass marks on their examinations before being allowed to play for their school in any line of sport was revised to take in all schools with an enrolment of over 150 boys. Formerly, this rule pertained to schools with a registration of 300 or more. The measure is also now "recommended" for schools with less than 150 boys. The transfer rule was also made more stringent.

An invitation was received from Kirkland Lake to have the N.O.S.S.A. basketball tournament played in that centre. It was also intimated at the meeting that Timmins would like to play hosts for the cage tourney, with games being played in the school gym at Schumacher. A decision will be made at a later date as to the venue of the tourney. It was staged at Schumacher last season.

Conveners appointed to arrange interscholastic play-offs are: rugby, Rev. Father F. M. Weiler, North Bay Scollard Hall; basketball, C. J. Fitzgerald, Kirkland Lake High School; hockey, M. L. Troy, North Bay Collegiate Institute and Vocational School.

Representatives from Sturgeon Falls, North Bay, Cobalt, Haliburton, Kirkland Lake, Timmins, Schumacher and South Porcupine were present at the meeting. C. K. Watson, Sturgeon Falls, acted as chairman and George Cassidy, Cobalt, as secretary. The sport session

Hunters Have Poor Luck at Moosonee This Year

Among the hunters returning this week from the Moosonee district were Messrs A. H. Wohlrah, W. M. Widdfield and Dr. N. Russell. Usually these hunters return with a good bag from the trip north, but this year is different. In view of the remarkably fine weather this fall, the geese hunting season opened too early. The birds have not yet left the marshes of the far North. While many of the birds were seen, they were not within range of the hunters' guns.

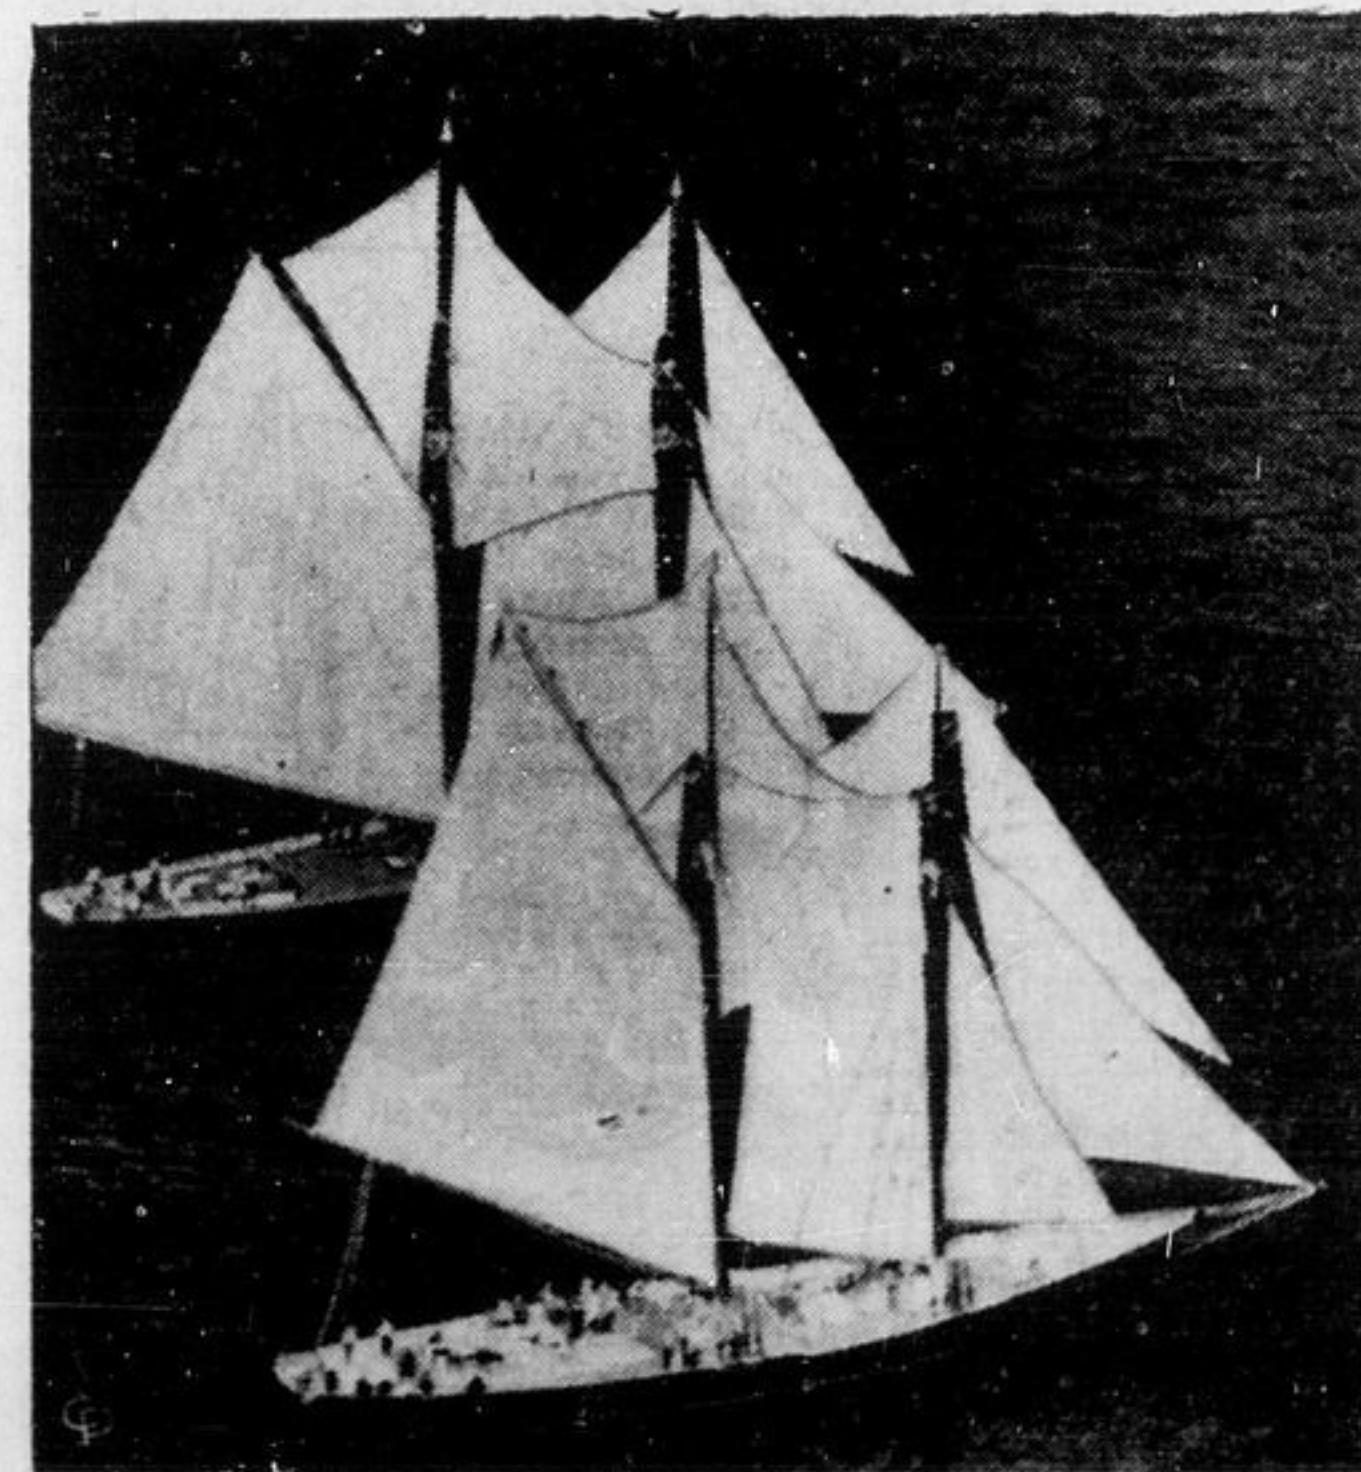

Betty Lou of Jasper Is Again Back on the Road

Jasper, Oct. 19.—Probably Canada's best-known canine traveller, Betty Lou of Jasper, is back on the road. A smart little Boston terrier, Betty Lou started her travels several years ago, carrying a small suitcase she takes along on the train.

Twelve months ago a railway order stopped her trips with her master, William Wock, C.N.R. baggageman on the mountain run between Jasper and Kamloops. But now hoist of the ban has left the way open for resumption of her travels. All along the 500-mile route Betty Lou is renewing acquaintances; she is known to every railway man between the two centres. She has averaged more than 40,000 miles a year since her travels began.

Walkerton Herald-Times: An exchange might have had Walkerton in mind (though we doubt it) when it declared that if some folks would holler as loud and as long for the good causes of their home town as they do for the baseball team, it would help considerably in putting the community ahead.

NO RACE, BUT A PRETTY PICTURE

The schooner Gertrude L. Thebaud and Bluenose presented a pretty picture as they drifted side by side during the second of the series of races for the International Fishermen's Trophy. The race was cancelled due to lack of wind when neither boat finished within the time limit set for the race. The Thebaud has a slight lead on the Bluenose. ABOVE, as the crafts drifted out to sea on the first leg of the race.
