### Quarterly Statement of McIntyre Porcupine Mines

McIntyre Porcupine Mines had net income, after depreciation, of \$884,086, or \$1.11 per share, in the three months ended Sept. 30, the second quarter of Kapuskasing Tuesday noon. Nobody in the company's current fiscal year, com- town knew in advance that the minisparing witth \$915,231, or \$1.15 per share | ter, who is in the North on one of in the preceding three months. Net for his periodical visits of inspection, the six-month period stands at \$1,799 .- | would be coming to Kapuskasing, so 317, or \$2.25 per share, against \$1,757.-121, or \$2.20 per share, in the compar- considered as far as can be learned. able period of 1937.

Gross income for the last quarter was spent less than two hours in town, \$2,121,458, against, \$2,168,538, making meeting Dr. L. A. Dupont and several total of \$4,289,816 for the six months, others at lunch at the Kapuskasing against \$4,266,115 a year ago, an in- Inn. crease of \$23,701. Costs for the quarter were \$1,041,560, against \$1.043,267, or \$2,084,867 for the six months, against \$2,092,333, a decrease of \$7,466.

Appropriation for taxes was \$157,557. against \$177,259, or \$334,816 for the six month, against \$339,448, a drop of \$4,-631; while depreciation charges were \$38,216, against \$32,600, or \$70,816 for the six months, against \$77,213, a drop of \$6,397.

### Option Taken on Shares of MacGregor Porcupine

The Ontario Securities Commission states that by agreement dated October 5th, 1938, J. N. S. Dixon, Toronto, agreed to purchase 100,000 shares of MacGregor Porcupine Gold Mines, Ltd. at five cents per share, payable forthwith, and received an option on 1,900,-000 additional shares as follows: 400.000 shares at five cents each, 500,000 at seven cents; 11 blocks of 100,000 shares each at 10c, 12c, 15c, 18c, 20c, 22c, 24c, 26c, 28c and 30c per share, respectively. Payment to the amount of \$2,500 is to be made within 60 days, to be followed by payments of \$2,500 every 30 days for four months, then \$3,000 every 30 days a straight life?" Prospect: "Well, for three months, \$5,000 every 30 days like to step out once in a while." for the next seven months, \$7,500 each 30 days for seven months and finally \$10,000 every days until the option is completed.

The company was incorporated on several years." October 5th, 1938, under a province of Ontario charter. Head office is at 156 Yonge St., Toronto. The Premier Trust Co., Toronto, acts as transfer agent. Officers and directors are: Mrs. J. A. your fractions." Thomas, Toronto, president and manager: Jas. W. Ralston, Toronto, secretary-treasurer: Wm. A. Houghton, Dorothy Johnson and Jas. P. Manley. The company acquired the properties of MacGregor Porcupine Gold Syndi- ready. cate, in Whitney and Tisdale townships, Porcupine area, Northern Ontario, for 1,100,005 pooled shares. Authorized capital consists of 4,000,000 shares, \$1 par, with 1,100,005 issued.

### Mining and Milling at Dome Hollinger and McIntyre

Comparisons of the ore conditions at the Hollinger, Dome and McIntyre mines, and descriptions of the mining and milling methods at the three properties appear in a paper by J. D. Hall in the October issue of the Bulletin, Canadian Institute of Mining and Metalurgy. The paper is among those awarded a prize by the Institute in its

students' competition, 1937-38. Main geological feature of the Porcupine camp is the long contact between Temiskaming sediments and Keewatin lavas. The Dome deposits lie in both the lavas and sediments and occur along their contact. Both the ore and wall rock are strong, allowing the use of shrinkage stoping which greatly simplifies mining openations, Approximately 76 per cent of the gold in the ores occurs in a course, free state, and is most easily and cheaply separated from the gangue by gravity separation on blanket tables. Recovery of this part of the gold in the early stages of milling greatly decreases the time and cost of the cyanidation process which

The Hollinger and McIntyre ores occur only in the lavas in a large shear zone, and in both cases much of the gold in the ores is associated with sulphides. At the McIntyre any coarse gold is trapped, following grinding, by unit flotation cells, and a concentrate is made by flotation, which eliminates the necessity for a large and costly cyanidation plant. Hollinger ores contain less sulphides than do those of the McIntyre, and a separation can be made on tables, the concentrate from which is then reground and cyanided.

### Edmonton Looking for Northern Prospector

Edmenton, Oct. 22. - A swindler claiming to be from Sudbury, was sought by Royal Canadian Mounted Police today after he had cashed \$3,200 in worthless cheques. The man, police sald, masqueraded as a Northern Ontario prospector en route to mining fields north of Edmonton. He allegedly gave a cheque for the purchase of a 2.400 house and then used the purchase of the house as evidence of wealth.

Among other purchases through worthless cheques were an automobile, clothing, prospecting equipment, rifle, oil, compass, mirror and topcoat. Only the house has been recovered. One of the swindler's victims said he had been shown a letter of credit by the man indicating he had \$4,000 in an Ontario bank.

Huntingdon Gleaner:-Even "Brass Hats" won't be able to get a drink at the Aldershot military camp, near Halifax, in Nova Scotia. For the first time since the war, orders have been issued that no alcoholic liquor of any kind may be served in the camp. This aptroops are speechless!

### Report of Dome Mines for First Nine Months of 1938

Report of Dome Mines, covering the first nine months of its current fiscal year, shows gross bullion production of \$5,470,829, from 450,000 tons of ore milled. Average grade was \$12.15 perton. Grade of ore is holding steady, as average for the first half-year was \$12.17.

Development, operating and milling costs showed a slight rdeuction, standing at \$4,375 per ton, compared with \$4.42 for the first six months. Estimated operating profit is put at \$2,-937,971, which after, addition of nonoperating profit, left profits for the first three-quarters at \$3,183,304. Per share earnings are also holding steady as profit for the three quarters stood at \$1.63, compared with \$1.08 for the

"Money," he said, briefly. The onlooker smiled tolerantly. "Money, eh?" he said. "And when do you expect to strike it?" "Saturday," replied the workman, resuming operations.

#### BLOWING FOR ACTON (Acton Free Press)

In its service to the community, Acton Citizens' Band is quite sure not to overlook any feature. Until the present year its activities have largely been confined to Acton and in this the organization has done commendable work. This year the band has taken another step and gone into contest work.

That progress in this line is being rapidly made there is ample evidence. The band which won over Acton at the Waterloo contest by two points was beaten by the local organization during the week by four points, with both bands playing the same selection in both contests. Acton band has lived up to its slogan "Blowing for Acton Since 1872." Citizens generally are proud of its slogan. "Blowing for Acton Since congratulations are offered on the latest success and the wish that still higher honours will be won.

### MacGregor Porcupine Plans Diamond Drilling

At a recent meeting, unitholders of MacGregor Porcupine Gold Syndicate, approved the formation of a company 1.65 to take over and develop the syndicate's property in Whitney township, Porcupine area. Capitalization of the com-3.00 pany will be 4,000,000 shares of \$1 par 45 value and vendor shares amount to 3.20 1,100,000 held in escrow. When distri-1.65 | bution is made to unitholders the basis 4.70 will be 200 shares per unit. Capital 2.10 of the syndicate is 10,000 units of \$5 7.90 par value and 5,000 are issued,

A financing arrangement has been completed and is now awaiting approval of the Ontario Securities Commission. Diamond drilling is to be the next step in the development of the property and estimates are being secured at present Hamlin B. Hatch, consulting geologist, has spotted a series of holes.

A Temiskaming-Keewatin contact strikes across the property approximately 500 ft. south of the north bounhimself. Moreover, their method has dary, according to Mr. Hatch. South for district gatherings to be held here reduced road accidents fifty per cent. of the contact a broad band of slates

### Hope to Open Bridge at Fauquier Next Summer

(From Northern Tribune)

It is reported to us that the piers are in for the highway bridge at Fauquier over the Groundhog river, and that there is good prospect of getting the steel superstructure laid during the winter. This would permit opening the new bridge for motor traffic in early summer, or by the time the roads have lost their winter frost.

It will thereafter take less time to motor from here to Smooth Rock Falls, Cochrane, and Timmins, and the possibility of a holdup at the river, such as has happened from time to time with the old ferry, will be eliminated. Kapuskasing had the unhappy experience in 1937 of having many motor parties turn back at the ferry rather than wait for hours to get across, when the district firemen's celebration was held here on July 1st. Since that time, local bodies have been loath to ask because it was known beforehand by tiresome congestion at the ferry both coming and returning. From next year on, there will be many more mot-(between Cochrane and La Reine) with
