Think New York May Become Centre of World Finance

But Others Suggest to Wait and See Effect of Post-War Days.

From Yesterday's Globe and Mail) While the German aerial armadas were catapulted yesterday against England and vainly unloaded their cargoes of morale-softener, the leading stocks traded on the New York Stock Exchange lost from 11/2 to 5 points in a very short time. Confidence as to ultimate victory remained during this testing period as high as it has ever been in the hearts of Britishers, but traders on Wall Street followed unreliably the good, old reliable rule of not letting their sympathies or their hunches govern their money commitments and so trading adjusted prices to point where they could allow the course of events to decide their further course. One Guess Only As to Europe's

Best Fighters Insofar as preparations for our own home defense are concerned, it is absolutely essential for Canadians to give serious thought to what we will do if Churchill, Bob British resistance is o vercome. We Thayer, Jack should be all the more sedulous about it because we are so confident that the | Richardson, George British have what it takes. Miss Eunice Avery, a Boston elcturer who has spent many years in European countries as well as in the Orient and who has been Dollery, Ralph a keen student of national character Laplante, Babe as it has been revealed to her by innumerable interviews with men and women in their homes and places of business as well as with Mussolini and McShane, George other world figures, told the writer Sunday that she considers "the British people to be the best fighting race in Europe." This was an absolutely unprejudiced opinion by one who did not go one iota further to predict the outcome of the battle of England and apparently the same impression has

Will New York Be

World Financial Centre? Gerrard St. G. Walker, manager of Dominas, Pete the London office of Fenner & Beans, Lewis, Cy has just been telling New Yorkers that Labag. Babe there is a belief that after the war, Copps, Vic however it ends, New York will be the financial centre of the world instead of London and it is widespread among members of the London Stock Exchage. I think it probable that these E members of the London Stock Exchange know more about London than 1 they do about New York. Far-away 0 fields look green and I would not be 0 surprised at all if the years following 0 the end of the war find financial Lon-0 don doing a pretty lively business at the old stand even if it does not happen to be the very largest business.

If anyone thinks this statement of Mr. Walker implies defeatism among the brokers, he is very wide of the mark. It only means that they would cheerfully see the financial headship) of the world go to New York rather if New York is to get and keep this inal outlay of 25 cents.

position as world centre.

Britain's Brokers Become Battlers yond them, just as the arts of war will the money may be spent." prove to be possible for peace lovers.

occasion better than almost any other class of people in England. Not a man of military age and few men under 50 remain in business in the London financial district today. Brokerage firm members, clerks and other employees were among the first to join up as volunteers. Member firms of the London Stock Exchange have arranged to make up to their former employees now in the service all or a considerable part of the pay differential between their former salaries and their present military pay, regardless of the depressed volume of activity in the British mar-

Over-Military-Age Brokers "Carry On" The London Stock Exchange, Mr Walker added, is operating today in an absolutely normal manner, except for drastic reduction of personnel of the exchange itself and the depressing absence of every one of military age. While the great London banks and insurance companies have evacuated most of their operations to small towns fifty miles or more from London, the London Stock Exchange itself will not be removed from the City unless becomes physically impossible to carry on there. Its usefulness in time of war as a vital factor in the economic balance of the Empire, and its importance to the provincial exchanges in the industrial areas of England make its

retention in London imperative. Wartime restrictions and controls have curtailed trading on the London

Yet they have mains is confined to gild-edged securirisen quickly to the duties of wartime. ties, in which British trusts have re-"The London Stock Exchange crowd," cently been picking up bargains in lowsays Mr. Walker, "have risen to the priced British securities affording high yields. All trading is on a cash basis, contango and backwardation for margin trading having been eliminated as a war measure months ago. The British Are Thrice Armed

In listening to claims of German and

fifth-column radio broadcasts that German planes do great damage, it will be steadying to remember that a feature of the industrial reorganization of England incident to the war has been the duplication of nearly all major armament factories in isolated areas far from London, Birmingham, Liverpool and other industrial centres. Mr. Walker states that most of the companies manufacturing planes, motors, munitions, motor trucks and other military material could now continue operations at a high rate even if their original factories were destroyed by bombardment simply by moving employees to the replacement plants thus constructed, many of them underground. And, it might be added, we are providing a third reserve of industrial supply in Canada, besides what is bought from United States industry.

First Swordfish Catch of Season Weighed 466 lbs.

pounder taken off the historic Cape Breton town of Louisbourg by a commercial fisherman. Low Cost Houses Are Available Now **Under Housing Act**

Possible to Secure Loan of 90 per cent. of \$2,500 Property.

Up to the present one of the handicaps in the enforcement of the National Housing Act in Timmins has been the difficulty of financing low cost properties suitable to the purse of some families whose income did not permit a large amount for the purchase of a house. In all cases where the Nation-This usually called for an outlay a little beyond many purses. Now, however, the Sun Life has arranged to provide loans up to ninety per cent. of the cost of house and lot, while Hill-Clark-Francis have designs in houses that permit the erection of the home that is fully up to the National Housing Act standards, and yet keeps within the \$2,500 mark. This means a very decided advantage for the man desiring to own his own home but who has only a limited amount of cash and can budget for only a limited monthly payment to finance the deal. The pro-

NEW LOW-COST HOMES FOR TIMMINS DISTRICT

\$23.74 A MONTH BUYS THIS HOUSE UNDER NEW GOVERNMENT LOAN PLAN

Special government financing arrangements have been made by Hill-Clark-Francis Limited, Timmins contractors, for the building of low-cost homes. Fifty dollars is all the cash needed by a lot owner for the purchase of his house and monthly installments of \$23.74 pay the balance in 120 months including interest. Shown here, it is modern in design and well built even to insulated walls and roof. Four comfortable rooms, porch and 3-piece bathroom are provided.

The granting of government-guaranteed building loans on easier terms is further evidence of the stability of the mining industry and the soundness of small homes as an investment.
