usually give specific information for cooking. Some stores, however, carry their own brands or local products with no wrapper or instructions, and in this case your dealer should be consulted. Precooked hams are also available in packaged and canned form. These may be served cold without any further treatment, or may be spread with brown sugar and baked just long enough to develop a glaze. When you purchase ham, consult your dealer, look at the label, and choose the proper type of ham for the method you wish to use in cooking.

Cuts of ham suitable for boiling or baking: The more expensive hindquarters cut known as ham and the less expensive forequarter cuts known as shoulder, picnic, and cottage butts and the smoked tenderloin may all be boiled or baked. Any cut suitable for boiling or baking may be boned, but the bone is usually allowed to remain in the fine hindquarter ham. Hams from the hindquarter weigh between 10 and 14 pounds. Half may be bought, generally at the same price per pound. The forequarter hams weigh from 1 1/2 to 4 pounds and are suitable for the small family. Unless the label states that the ham has been specially prepared for quick cooking, hams are usually boiled before baking although they may be baked in a slow oven for the whole period of cooking.

Cuts of Ham Suitable for Boiling and Pan-Broiling: Thin slices from the butt or shoulder may be pan-broiled or "frittled". Slices from the leg may be broiled or pan-broiled. Cubed ham steaks may be pan-broiled.

If you get a soft permanent wave, you may dress your hair in an number of fashions. But if your hair comes out of the process frizzy, you will not be able to do a thing with it until it has had several reconditioning treatments.

There is a very new wave that may have reached your town, which is given without the aid of a machine. Your hair is rolled on little steel curlers, which are perforated. These curlers are later connected to small rubber tubes and a curling fluid is poured through the curlers. Then several gallons of fresh water is poured through to rinse out the curling fluid and if you desire you may have a softening shampoo directly after the waving is finished. This wave is supposed to be soft, and even thin stubborn hair seems to curl nicely by this method. If you have difficulty you might try it.

# Beauty and You

by PATRICIA LINDSAY

ROSEMARY LANE models one of the newest Greek coiffures in "Boys from Syracuse." It has a gracious beauty and is cool for summer nights.

# Coiffures of Ancient Greece Revived for Season Glamour

The ancient Greek women liked to dress their hair high and perhaps that is why the modern beauties are adopting those styles for summer wear. Curly are held high off the nape of the neck by colored bands, rolled kerchiefs, or false braids.

If you want to be truly glamorous one of these romantic summer nights, you may dress your hair in pompadour fashion with a mass of small curls in back from the top of your crown to the nape of your neck. Then take a ribbon or artificial braid and wind it around your head—back of your ears and off the front pompadour. That will keep the curls in place and look quite new and daring. Greek ladies pinned fruit or flowers in their hair, and so may you. In fact those little feathered birds are back in favor provided the gown you wear can stand such head decoration!

Do not shampoo your hair for two weeks after you get a wave, but do brush it well every day and have it set with water once a week. The natural oils of the scalp must be given a chance to lubricate the entire length of the hair which has been curled, and thus give it a lovely sheen. When you do have it shampooed use an oil shampoo or have an oil treatment before a soap shampoo.

Brunettes should strive for the more severe coiffures whereas blonds may have fussier hair-dos. Many brunettes find that having only the ends of their hair waved is sufficient to allow them attractive hair settings. But you must be your own judge of that. A flat soft wave on the crown of the hair may be pressed into sleekness by expert fingers.

St. Thomas Times-Journal: It's all the same to the Nazis. They'll torpedo or run down anything and everything, including enemy soldiers, repatriated French fighters, their own men being taken to Canada as prisoners or lying wounded in the path of their tanks. They really do prefer women and children, as target, especially those in flight to safety, but when these are not available they'll tackle whatever looks defenceless.
