

Tie With Ankerite Sends Dome To Cellar

Hollinger Celebrate Return Of "Bummer" Doran To Take League-Leading Macs by 5-2

Big Former Pro Star Adds Strength to Greenshirts' Rearguard as Hollinger Pass Dome to Take Over Third Place. Delmonte Scores Pair for Winners in Friday Night Game.

Reinforced by the presence of "Bummer" Doran on the defence, Hollinger Greenshirts put on an aggressive display of hockey Friday night to defeat the league leading McIntyre clan by a score of 5-2. The win sent Hollinger into third place in the group standings, two points ahead of Dome.

The return of Doran to the Hollinger Club seemed to make a great difference on the rearguard. The big former pro reinstated only last week after expecting his amateur card since the start of the season, seemed to be lacking a little in condition but his performance otherwise, was all that could be desired. His reputation as a "bad man" seems to be still clinging to him and the slightest move on his part brought roars of shouts from partisan fans. With another game or two under his belt, Doran should give the Greenshirts the blue line strength that has been missing most of the season.

On the night's play, Hollinger definitely deserved the win but had shooting by McIntyre robbed them of what appeared to be sure goals. In the first period Holouka missed an open net on a pass from Ted Lister and in the second Somers shot over the top of the net from point-blank range with Bentley at his mercy. Lorraine flopped in the third an open net in front of him and Bentley had to make a spectacular stop on a drive by Lone near the end of the game.

The game started out at a comparatively mild pace and it was not until the eighteenth minute had ticked off that the Hollinger started their victory march. "Wink" Wilson checked Lorraine inside the McIntyre blue line and passed to Stewart. Stewart then flipped the pass back to Wilson and the latter blazed one past Beare. Less than a minute remained when Cooper scored on a pass from Jack Drummond to put McIntyre back on even footing and tie the score 1-1. Hollinger were short bargued at the time, Ab Kerr being in the box serving a penalty for tripping. This was also the set-up when Wilson scored the first goal.

With Bowman of the McIntyre in the penalty box in the second period, Mike Horbel grabbed a loose puck inside the blue line on a Hollinger power play and flipped it into the cage to put the Greenshirts one up. McIntyre were pressing hard when Delmonte and B. Wilson broke fast and caught the Macs with only one man back. Roaring through with everything they had, Wilson laid a pass over to Delmonte that the latter made no mistakes on. McIntyre came out fighting in the last period and in the first minute Murphy hit the side of the net on a close play. Ab Kerr drew his second penalty of the night and McIntyre gave Eandley a few anxious moments. Just before Kerr got back there was a dangerous scramble in front of the net but the two teams were at full strength before the scoring started again. Just before the nine-minute

mark Joe Delmonte went through to score Hollinger's fourth goal of the night unassisted. It was a pretty piece of stick handling that sent Delmonte into position and he blazed a waist-high shot that Beare had little chance on.

McIntyre still kept pressing but the Hollinger squad were equal to every thrust. Finally Lone picked up a rebound from a hard shot by Killen and rapped the rubber home with less than three minutes to go. A minute later Alex Stewart combined with B. Wilson and Horbel to score the last goal of the night. Just before the game ended Somers and Doran started to mix things up but the pair were separated and chased to the box before any real battle could get started.

Hollinger—Goal, Bentley; defence, Dawson and Delmonte; centre, W. Wilson; wings, Gordon and Palmer; alternates, Horbel, B. Wilson, Hafidson, Baker, Kerr, Villeneuve, Dawson, Stewart, Doran.

McIntyre—Goal, Beare; defence, Killen and Bowman; centre, Lister; wings, Cooper and Drummond; alternates, Holouka, Hurphy, Somers, Baker, Petrucci, Lone, Lorraine, Colquhoun.

Referee—Joe Raybould and Frank Frayley.

SUMMARY

First Period	
Hollinger, W. Wilson (Stewart)	18.09
McIntyre, Cooper (Drummond)	19.37
Penalties—Kerr.	
Second Period	
Hollinger, Horbel (unassisted)	7.10
Hollinger, Delmonte (B. Wilson)	18.12
Penalties—Doran, Bowman.	
Third Period	
Hollinger, Delmonte (unassisted)	8.25
McIntyre, Lorne (Killen)	17.38
Hollinger, Stewart (B. Wilson)	18.31
Penalties—Kerr, Killen, Doran, Somers.	

Draws For T. & N. O. 'Spiel

Shown below are the draws for the T. & N. O. 'Bonspiel' commencing at 2:03 4:45 and 7:30 p.m. All skips are requested to be ready to start promptly at the time shown. Results of the first two draws are shown on Page 1.

2:00 p.m. Draw

- E. J. MacVittie vs L. Sauder.
- W. C. Arnott vs P. R. Gibson
- H. Scarth vs R. Harris.
- Rev. D. MacKeracher vs J. Isherwood
- Dr. L. Hudson vs H. L. Grant.
- A. R. Bettiol vs H. B. Hawley.
- J. S. Amm vs D. Hannason
- G. P. Greenacre vs T. L. Downing.
- J. Gardner vs F. H. Hyckie
- J. Seubert vs O. M. Henderson
- J. S. Kitchen vs J. R. Davis

4:45 p.m. Draw

- H. Graham vs W. Hyndman
- G. P. Black vs F. C. Evans
- A. Cain vs W. R. Thompson
- I. A. Solomon vs Dr. R. J. Neelands
- S. McCoy vs T. Rowe
- Dr. O. Stahl vs T. Tooke
- T. Tod vs J. D. MacDonald
- A. E. Lake vs Dr. Somerville
- W. O'Donnell vs L. White
- E. Olive vs G. Doggett.
- J. P. Dick vs R. S. Taylor

7:30 Draw

- A. Pugsley vs Dr. Dales.
- D. M. Rankin vs winner of (L. Hudson vs Grant).
- Winner of (Richmond vs Goddard) vs winner of (Pickering vs MacMillan)
- Winner of (Kilborn vs Stephenson) vs winner of (McDowell and Volume)
- Winner of (Jamieson vs Linghorne) vs winner of (MacVittie vs Sauder)
- Winner of (Moscoe vs Harvey) vs winner of (McMahon vs Husband)
- Winner of (Sharp vs Murdoch) vs winner of (McGuire vs Howey)
- Winner of (Drew vs Abrams) vs winner of (Doyle vs Leach)
- Winner of (Linklater vs Brown) vs winner of (Reid vs Woodings)
- Winner of (Eyre vs Gomoll) vs winner of (Lang vs Fraser)
- Winner of (Rinn vs Eplett) vs winner of (Stephenson vs Freeman)

Encore

An actor decided to give up his career, and become a doctor and in a short while he was achieving a great deal of success. One day he was performing an operation for appendicitis, and as usual the operating theatre was filled with students. The operation was performed so successfully that at the end, the students broke into loud applause. The old actor spirit returned, and the surgeon, after bowing his appreciation hurried back and removed the patient's tonsils as an encore.

T. & N. O. Takes Second Place in Bowling League

Some Poor Bowling by The Advance.

The T. & N. O. went into second place in the Commercial league Friday by whitewashing The Advance for three points.

Gambles still lead by taking two points from the Power.

The printers rolled out their worst game in many seasons. The T. & N. O. on the other hand are keeping up their fine bowling.

After the first game, Gambles went all out, rolling over twelve hundred in the second and over the thousand mark in the third, to take two points.

The standing: Gambles 8; T. & N. O., 7; Power, 6; and Advance, 3 points.

Ninety-One Rinks Compete In Record-Setting 'Spiel' Starting With Lee Trophy

Complete List of Competitors Shown Below, Along With Club Affiliation. Possibility That Number of Entries May be Limited in Future if They Continue to Increase.

Shown below is a complete list of the rink personnel taking part this week at the record-breaking Eleventh Annual T. & N. O. 'Bonspiel', being held at the McIntyre Community Building. Sixty-eight rinks was the previous record, according to "Ike" Solomon, one of the chairmen for this year's 'Bonspiel'. It was stated officially that provided the 'spiel' continues to grow the day is not far distant when a limit as to entries will have to be put into effect. Officials of the McIntyre club are highly elated at the response for this year's big event and no effort is being spared to make the affair a brilliant success. The following are the rinks, the first mentioned in each case being the skip—

McIntyre

- J. P. Dick, S. Saxton, H. J. O'Neill, A. F. Mitchell.
- W. Jamieson, F. A. Burt, F. Bailey, W. Good.
- J. S. Amm, A. Fulton, J. Sandwith, F. Dwyer.
- Dr. O. J. Stahl, G. White, F. Dales, H. Chateaufort.
- A. R. Bettiol, J. M. Quinn, A. F. Quinn, C. Corrigan.
- J. W. Tod, Dr. R. P. Smith, Ned Roberts, E. Saloman.
- Dr. H. Hudson, R. Fleming, J. Dalton, G. Chénier.
- W. O'Donnell, J. Bennett, J. Bristol, K. Kilborn, H. Leng, H. Waddell, E. Pooley.
- George Drew, A. Carson, E. L. Urquhart, N. Leaman.
- Dr. L. Hudson, J. D. Sutherland, W. Sutherland, D. A. Sutherland.
- A. W. Pickering, J. J. Sutton, L. Redford, H. Laine.
- E. Olive, M. McMillan, C. Macgregor, W. Willis.
- J. T. Black, R. Lafferty, M. E. Welt, C. R. Harris.
- A. W. Lang, R. E. Sturgeon, W. J. Hannigan, R. E. Yorkie.
- W. C. Arnott, A. Murray, F. Rankin, Rev. Fr. Martindale.
- Harvey Graham, S. Calabick, T. Morrison, W. J. Moore.
- J. S. Kitchen, D. Taylor, G. G. Cameron, G. Richardson.
- I. A. Solomon, G. Mihm, C. C. Wood, E. Newkirk.
- P. J. Doyle, P. J. Dunlop, W. Doyle, C. Desanlier.
- H. Moscoe, S. Piatos, C. Abrams, T. Feldman.
- J. R. Hall, F. W. Simpson, J. Dales, F. Furlong.
- D. McGuire, N. O'Donnell, J. McNeil, F. Miller.
- A. F. McDowell, W. Burns, R. Smith, K. Beatty.
- K. Eyre, J. T. Gauthier, D. Prior, K. Little.
- H. Scarth, E. Hansen, D. Fitzjohn, C. F. Watson.
- A. E. Lake, G. H. Francis, J. G. Chalmers, J. A. Elliot.
- J. Subert, P. Carson, H. B. Cymbalski, P. Jenny.

Timmins

- E. L. Reid, D. Stevens, B. McDevitt, J. N. Sisson.
- Albert Cain, H. Herman, A. Demeza, H. Wheaton.
- W. R. Rinn, George Lake, O. Atkins, H. Shantz.
- D. Cloutier, G. A. Chénier, F. J. Passmore, E. M. Stenhouse.
- S. McCoy, L. Pare, W. McDermott, D. James.
- J. R. Walker, B. Longworth, G. Countryman, G. Hopper.

South Porcupine

- F. C. Evans, P. E. Cooper, W. S. Blake, G. Brown.
- L. Sauder, W. S. Adamson, W. S. Gardner, W. G. Smith.

North Bay

- R. Harris, I. Martin, K. Rankin, F. St. John.
- A. Freeman, F. Gifford, S. Bush, R. P. McLeod.
- H. M. Gomoll, J. E. Bedard, Dr. McKee, D. McDonald.
- W. B. Harvey, V. R. Andrews, C. Church, H. Brohman.
- D. Hannason, I. J. Rodier, H. Church, T. Steep.

Englehart

- B. Fraser, H. Way, J. Nolan, E. Perry.
- E. V. Woodings, J. Legare, G. Thib, W. Church.
- H. G. Murdock, E. A. Smith, J. Howard, J. Clark.

Neranda

- D. Pilon, I. A. O'Donnell, H. Grier, A. G. Morrison.
- W. Hyndman, Dr. Bell, B. Meahan, I. Cook.

Pamour

- J. Linklater, Steak, Wearing, McClellan.
- G. F. Greenacre, E. Crull, R. Harrison, T. Lazier.
- C. D. Stevenson, L. G. White, C. E. Anderson, A. W. Bromley.
- A. L. Sharp, S. Richards, Cunningham, McGrath.

Cochrane

- Rev. D. A. MacKeracher, W. L. Worral, N. McLeod, N. McPhee.
- E. J. MacVittie, A. Hurd, M. David, F. Bellis.
- J. Gardner, H. E. McGill, L. Stevens, M. Scaplon.

Kirkland Lake

- J. R. Davis, A. G. Sackrider, H. D. McNabb, W. H. Gauley.
- G. Doggett, T. Ramsay, G. A. Sutherland, H. McPhail.
- H. B. Hawley, G. A. Goddard, H. S. Rood, H. Doggett.
- J. A. MacMillan, T. Marston, M. Robb, B. A. Haller.
- F. H. Hyckie, A. R. MacDonald, T. Houston, W. H. Keiser.
- Dr. R. J. Neelands, W. T. Sampson, K. C. Gray, G. A. Horos.

Gold Shows Increase of Many Millions.

Running at an all-time high in capacity, the industry further stepped up operations with the result that gold leader in the field, jumped production from \$184,000,000 in 1939 to more than \$220,000,000 for 1940.

A record production value of \$474,600,000 for all minerals was established in 1939, increased from \$444,824,000 in 1938 and \$457,359,000 the year previous. For war purposes the mines sacrificed possible profits and more than \$500,000,000.

The record shows that in 1915, the second year of the First Great War, Canada's mineral production was worth \$137,000,000 and after four years of intensive development to meet requirements of the munitions industry the total value was slightly more than \$200,000,000 annually.

The contrast is drawn most sharply in gold production. In 1915 the mines yielded \$16,000,000 as against the more than \$200,000,000 gold production in the second year of the current conflict.

Placed Miner at Front in War Work

It vital does the Government consider gold as an increasing source of all-important foreign exchange that G. C. Bateman Canadian Metals Controller, recently was able to go on record with the statement "no worker in any business or industrial field today performs a more valuable service than the hard-rock men in the gold mines."

Again in 1915, Canada refined no nickel, copper or zinc, and the production of lead ran to only 90,000 tons, 10 percent of the output today. This year the industry will have brought up refining capacity for these metals to nearly 1,000,000 ton level, sufficient not only to meet all Canadian requirements, but to fill a large part of Britain's orders.

Prices at which these metals have been made available to the United Kingdom represent in certain cases a great voluntary contribution on the part of the mining men.

At the beginning of the war Canadian producers of lead, copper and zinc entered into contracts with the United Kingdom for delivery of about 3,000,000,000 pounds annually, at prices which averaged about one-third less than the Canadian equivalent of current domestic charges for the same metals in the United States. This represented an annual saving to Britain of \$35,000,000.

Mining Taking Big Part in Dominion's Effort for the War

Gold Has Important Place. Raw Material for Arms Comes from Other Metals

In the very informative and inspiring special editorial issued by The Ottawa Journal to review Canada's role in the war and suggest the possibility of a big greater effort, it is only logical that some particular attention should be paid to Canada's mining industry. There is an article on mining that shows the part that Canada is taking to provide the raw material for arms and construction and the gold to provide foreign exchange. The article points out that production had reached an all-time high in 1940 and that expansion is under way. The article refers to the essential metals needed for war purposes and provided by Canada, it being noted that Canada has but two weaknesses in her armor of resources—all and iron—but cannot effort may be able to strengthen the production in these two lines. The following is the article written by a member of The Ottawa Journal staff.

MINING

(By Richard C. Jackson)

Paced by the drills of the hard-rock crews in Northern Ontario and Northwestern Quebec, production of Canadian mines in the second year of the war climbed to an all-time high in excess of \$500,000,000.

From the iron, copper, nickel, lead and aluminum ores are moulded the sinews of war, and from the goldfields of Rouyn-Noranda, Kirkland Lake, Timmins and other camps come almost as much treasure for the war effort as is raised by taxation—but with this difference—the \$200,000,000 or better which the hard-rock men brought out last year go to the United States to bolster Canada's foreign exchange position.

The outbreak of war found the Canadian mining industry operating at the highest level in its history, and in the position at the start to make a contribution of utmost importance to the struggle for freedom and the democratic way of life.

Gold Shows Increase of Many Millions.

Running at an all-time high in capacity, the industry further stepped up operations with the result that gold leader in the field, jumped production from \$184,000,000 in 1939 to more than \$220,000,000 for 1940.

A record production value of \$474,600,000 for all minerals was established in 1939, increased from \$444,824,000 in 1938 and \$457,359,000 the year previous. For war purposes the mines sacrificed possible profits and more than \$500,000,000.

The record shows that in 1915, the second year of the First Great War, Canada's mineral production was worth \$137,000,000 and after four years of intensive development to meet requirements of the munitions industry the total value was slightly more than \$200,000,000 annually.

The contrast is drawn most sharply in gold production. In 1915 the mines yielded \$16,000,000 as against the more than \$200,000,000 gold production in the second year of the current conflict.

Placed Miner at Front in War Work

It vital does the Government consider gold as an increasing source of all-important foreign exchange that G. C. Bateman Canadian Metals Controller, recently was able to go on record with the statement "no worker in any business or industrial field today performs a more valuable service than the hard-rock men in the gold mines."

Again in 1915, Canada refined no nickel, copper or zinc, and the production of lead ran to only 90,000 tons, 10 percent of the output today. This year the industry will have brought up refining capacity for these metals to nearly 1,000,000 ton level, sufficient not only to meet all Canadian requirements, but to fill a large part of Britain's orders.

Prices at which these metals have been made available to the United Kingdom represent in certain cases a great voluntary contribution on the part of the mining men.

At the beginning of the war Canadian producers of lead, copper and zinc entered into contracts with the United Kingdom for delivery of about 3,000,000,000 pounds annually, at prices which averaged about one-third less than the Canadian equivalent of current domestic charges for the same metals in the United States. This represented an annual saving to Britain of \$35,000,000.

Selling Metals Below First War Prices.

During the First Great War copper

Luckless Porkies Drop To Last Place In Group Race After Saturday Night Draw

Bisons Overcome Two-Goal Deficit Built Up by Dome. Tying Tally Comes After Wild Scramble Late in Third Period. Hollinger Now in Third Place, One Point Ahead of Dome.

At 27 cents a pound and was finally pegged by the United States at 28 cents a price which was more than 250 percent higher than the British government gets the metal from Canada today. Again in the last war, high-grade zinc brought 27 cents a pound, and it was the work of one Canadian mining company which finally led to Britain being able to get the metal at 15 cents—but even this price was 400 percent greater than that at which the industry is currently supplying Britain.

In the second year of the First Great War, Canada produced no ferro-alloys, but today the Dominion provides all domestic requirements, and, especially since the conquest of Norway, supplies the bulk of Britain's needs.

The same more or less hold true with nickel, lead and aluminum. Those are the leaders in the Canadian mining industry, but if Canada's metal production was confined only to nickel, lead, aluminum, copper, gold and zinc, wartime as well as peace time industry would stall and the war effort falter.

Some Minor Metals of Great Value

Among Canadian mining production needed in peace and essentially life-and-death industrial requirements in war are:

Manganese for shell-making;

Chromium for steel alloys and stainless steel;

Tungsten for high-speed steels;

Molybdenum for armor plate and special shock-resisting steels;

Magnesite for refractories, without which production of steel and the nations non-ferrous metallurgy would be crippled hopelessly;

Mica for electrical insulation, and, more important, an essential material for aircraft sparkplugs;

And tin, antimony and other lesser-known metals for rabbits and bearings.

The Empire pit-head for the most important of the war minerals, Canada has two weaknesses in her armor of resources, oil and iron ore, but in both cases, the deficiency is being reduced.

May Have Sufficient Oil and Iron

Rapid development of the Turner Valley oil field in the past few years and the recent indications of further wide expansion of the proven area promise what is hoped to be a future self-sufficiency.

Development of Iron Ore Properties

is less advanced than the petroleum industry, and Canada's only producer is a large but low-grade property now capable of a 450,000-ton a year output. In addition, high grade deposits on another property now being developed indicate a possible production of 750,000 tons of exceptionally pure ore.

Increasing employment in the mines kept pace with production, but to a lesser extent. The average number of men employed in the mines since war's outbreak is five percent larger than 1938 and early 1939, while that in the metallurgy branch is almost six percent greater.

To squeeze the last possible ounce from the rock, the industry has installed new equipment in a large percentage of the producing plants, extended shifts and increased wages, which combined, offset the failure of the employment index to keep pace with increased production.

Industry as a Whole Has Fine Record
