Simple Matter to Carve Meats, Says Miss Barber

Cut Vertical Slices from Centre Toward the Bone, Says Culinary Expert. Methods of Roasting Listed. Searing, Medium, Well Done by the Two Methods.

(By EDITH M. BARBER)

The other day when I was dining with friends the host complained about being asked to carve a leg of lamb before guests. "The hardest meat in the jelly mixed with one-half cup bailing world to care. Why don't you have a crown roast?" he asked. His wife replied that crown roasts were expensive

and reserved for special guests. We went on with a discussion in regard to the easiest method for carving that leg in front of him. First or all the roast should be placed in front of the carver with the heavier section, or cushion, away from him. The fork should be inserted at the left and vertical slices cut from the center toward under six pounds and 22 minutes per the bone. If you would like to have pound for roasts over six pounds. special directions for carving. I can highly recommend "Carving the Easy Way," by Lily Haxworth Wallace. Published by Barrows. Mrs. Wallace thinks first of all of making carving simple,

instead of an elaborate rite. In this country we like our lamb well done. A meat thermometer makes it possible to roast meat of any type exactly to the proper point. The time allowance per pound will depend upon whether you use the searing or the low

temperature method, both of which are

Roast Leg of Lamb.

Wipe meat with cloth. Do not remove thin skin. Rub with salt and pepper. Place fat side up in uncovered roaster. If a meat thermometer is used, make a hole with a skewer through the skin side and insert themometer so that the bulb will be in the center of the roast, but not touching the bone. Roast acording to either of the two methods given below. If a meat thermometer is used, the final reading should be 180 degrees F. for medium and 185 degrees F. for well done. Serve with brown gravy or mint sauce, browned pptatoes and buttered peas or cauliflower. Allow about one-half lb. meat (and bone) per serving.

Note: For the small family the loin chops may be removed from the end of the cut of meat and used for broiling the day after serving the roast. A peeled clove or garlic may be rubbed over the roast before it is put in the oven, or may be inserted in the center. This should be removed before the meat is served. During the last hour of roasting the meat may be basted with one-half cup currant or grape water. This gives an attractive glaze and an interesting flavor.

Method 1: Searing Searing in hot oven (500 degrees F.)

15 to 20 minutes, until meat is brown Reduce heat to moderate (350 degrees F.) for the remainder of the time. In estimating time per pounds, include

LUUN DUMAI MUDDEN is now a vital war material

Enemy action in the Far East has caused such an acute shortage of rubber that our whole war effort is in serious danger. Canada and her Allies must have rubber, quickly, for the armed forces, for factories, for ships. The Japanese control our source of crude rubber imports—the only other quickly available supply is old scrap rubber, which can be reclaimed. Every citizen in Canada must do his part in collecting all the scrap rubber in the country and turning it over to the Government for war purposes. Here is how to do it.

THIS IS AN URGENT APPEAL FOR YOUR HELP

Question: Is the rubber situation really

Answer: The shortage of rubber is so grave that any citizen hoarding rubber or using it unnecessarily is committing an act of disloyalty. It is now illegal to destroy any rubber article.

Question: Of what use is reclaimed rubber?

Answer: Old rubber is processed so that the rubber content is reclaimed. This reclaimed rubber is used in the manufacture of essential articles for our war effort, thus replacing crude rubber.

Question: How much scrap rubber is needed?

Answer: Fifty Million Pounds. This is a large quantity, but it MUST be found. Every old piece of rubber in Canada, no matter how small, is needed, QUICKLY.

Question: Should I turn in any usable rubber articles as well as worn out ones? Answer: Absolutely not! By no means

discard anything that is still useful and that might have to be replaced. On the other hand, rubber tires used as boat bumpers, swings, etc., should be turned in for war uses.

HOW DO I TURN IN

Answer: Every all-rubber or part-rubber article must be salvaged. Here are a few of the articles you must turn in: Old Tires of every kind Rubbers

Question: What kind of scrap rubber is needed?

Old Inner Tubes Overshoes Rubber Boots, Hats, Coats, Aprons, Pants, Gloves, Tubing, Matting, Toys Sport Shoes (crepe soles are especially good) Garden Hose Hot Water Bottles Stair Treads Bathing Caps and many other articles

Question: What happens to the scrap rubber Answer: The scrapeis sorted, baled and assembled into carload lots and is then purchased by the Government at fixed prices throughout Canada. The Government pays forwarding transportation charges on these carload lots, and

indirectly in the war effort. Question: How do I go about saving scrap

is responsible for their allocation. You may be

sure that every pound will be used directly or

Answer: Start hunting for it TODAY. Clean out your cellars, attics, garages and sheds right away. You will find more rubber articles than you expect. Start them all on their way to the

MY SCRAP RUBBER?

The school boys and girls of Canada are being organized, through the school authorities, to act as Official Collectors of Scrap Rubber. The school nearest you is, therefore, your best Collection Depot. You may dispose of your scrap rubber in any one of the following four ways: 4. Sell it to a junk collector.

1. Give it to the children for their school

2. Give it to your local National Salvage Com-

3. Leave it with any Service Station or Tire Dealer where you see the sign; "Voluntary Scrap Rubber Receiving Depot."

When you gather up your scrap rubber and dispose of it by one of these methods, it will be used by the Government for Canada's War Effort. Do it NOW!
