

Brunette's Taxi Celebrates Thirteenth Anniversary Opening New Sub-Station

After spending the way in taxi service to the people of the Porcupine district for the past thirteen years, Brunette's Taxi took another forward step this week with the opening of a new sub-station on Wilson Avenue. This is just another of the extra services that are offered to the public by this up-to-date taxi service and it is in keeping with the country's war effort and the company's policy as it is a big step toward saving gasoline and tires.

Brunette's Taxi asks its patrons in the western section of the town to make use of this new service and they also will help in the saving of gasoline and oil and tires. It costs nothing extra to make use of this service.

During the past thirteen years the Brunette Taxi firm has always been first to inaugurate some new idea that would be of benefit to their customers. Employing only seasoned and safe drivers the firm's first thought is for the safety of their passengers. Large amounts of insurance are carried by the firm and should any passenger be injured through an accident while riding in a Brunette Cab, this insurance provides for any loss or damage caused the injured passenger.

Another of the services of the Brunette Taxi company is that of transporting miners at the small mines in the district to their work. A very small fee is charged for fifteen day periods and every shift the men will be taken to the mine and returned after their shift. This is a service that is greatly appreciated by the miners in some of the farthest mines, such as the Naybob and Desantis.

With a definite shortage of rubber and gasoline in the country, Brunette's Taxi is determined to save on both. Their tires will last much longer and large amounts of gasoline will be saved if the public will co-operate by making use of the new sub-station on Wilson Avenue. By using Brunette's Taxi you will be saving your country by helping to save these precious commodities.

Brunette's Taxi has a large fleet of the most modern cars, fully equipped with heaters and radios and luxurious upholstery to make the trips more comfortable for their patrons and after spending the way in service for the past thirteen years they intend to continue to lead the way for years to come. Helpful suggestions from the patrons are requested by the firm and they can rest assured that Brunette's will spare no expense to keep their fleet of taxis still the best in the district.
