How They Look on The "Zombie" Army in the United States

Former Resident of Timmins Gives the Question from the U.S. A. Angle

At the present time when the discussion of reinforcements for the soldiers overseas is such a live topic and when the "Zombie" Army is receiving so much attention, it is interesting at least to note the United States reaction to the question. The following letter is written by a popular pioneer of the North Land, but it is written from the U.S. A. angle. The Advance believes it voices the idea of the majority of United States citizens. For that matter it speaks the opinion held by the majority of Canadian insofar as it trucks on they thought that all parts of Canada should be equally in this war in every way and there should be no favouritism or discrimination in regard to any part

(This is the sixth in a series of ten weekly articles especially written for The Advance by Richard Hale, chief pensions efficer of the Canadian Legion, Ottawa headquarters.)

(By Richard Hale) Ottawa, Nov. 23 (Special) - A considerable difference exists in the rates of pensions for members of the women's divisions and men in the active forces. There is also provision for pensions for dependent, parents or children.
