**To Rebuild Wharves and Warehouses at Temagami Resort**

Work Starting This Week Increase of Tourist Trade Expected This Spring

According to announcement made last week, work was to be started this week on the rebuilding of the wharves, warehouses and other structures of what was formerly known as the Temagami Boat Co., but which was taken over last year by the Temiskaming and Northern Ontario Railway, more commonly called the T. & N.O. In reference to the proposed plans of the T. & N.O. Railway in this regard, The Haileyburian last week says:—

"Jos. Isherwood, Haileybury contractor, who spent some years on war construction in British Columbia and returned to town last summer, will be in charge of the work and the whole improvement plan will be completed within three months, or in time for opening of navigation in spring.

Some months ago the boat company assets were purchased by the Temiskaming and Northern Ontario Railway Commission as a part of a general plan for improvements in the area served by the publicly owned railway. A subsidiary company Temagami Navigation Limited and headed by Col. W. W. Johnston of North Bay, will administer the project and a recent by-law of the organization provided for the head office of the company to be located in North Bay.

Plans for the improvements at the summer resort include the removal of the present buildings and the building of new wharves. These will be composed of crib work filled with rocks, along lines similar to the construction of the breakwater at the Haileybury airport. The new buildings to be erected will be of modern construction and of larger size than those at present on the property. There will be a new office building and a large warehouse on the present site and a new boat repair shop is included in the plans, which also show improvements to the grounds and larger areas to be provided for car storage.

"It is rumored that the company has already purchased two new boats for Lake Temagami, but this could not be confirmed. In any event, the improvements now to be made will ensure that all who visit the summer resort will be well looked after."

**Licenses Renewed For All Beverage Rooms in Timmins**

The Ontario Liquor Control Authority Board met at Kirkland Lake last week to consider applications for licenses for beverage rooms in this part of the North. All the licenses for beverage rooms in Timmins were renewed. An application for a licence for the Goldfields hotel, Timmins, was held over for consideration. The granting of this license was strongly opposed by the Porcupine Ministerial Association and by individual churches and others on the grounds that 20 beverage rooms in Timmins was more than enough to meet the requirements. There was also objection from the public school board. The application was held over without decision being given by the board.

**A BUSINESS SESSION**  
on  
**The London Life Annual Report**

*Questions and Answers that reveal valuable information*

**Is the Company playing an important part in providing financial security for Canadians?**

It certainly is. The Billion Dollar mark in life insurance in force was passed during the year. The total at the end of 1944 was one billion and thirty-four million. This is about one-ninth of all the life insurance in force in Canada.

**How much insurance did Canadians buy from your Company last year?**

One hundred and sixteen million—more than two million dollars a week.

**Are war claims heavy?**

War claims were twice as large as a year ago but well within the amount for which provision had been made. The Company has made preparation for unusual strain by building strong contingency reserves, as well as providing for claims which may have occurred but of which it has not received word.

**What are the Company's principal financial obligations?**

Policy reserves are the chief item. They amount to over \$151,000,000 and represent 74% of the total assets. Other liabilities to policyholders and their families, such as money left on deposit with the Company and policy dividends, total almost \$27,000,000, which is a further 13.2%. Other items including staff pension fund, capital, provision for taxes and miscellaneous liabilities total \$10,700,000 or 5.2% of the assets.

**What are the resources of the Company?**

The total assets are now \$204,282,000. Over ninety-two percent of this sum is required to cover the obligations just mentioned and the remaining 7.6% represents contingency and surplus funds held for added security to policyholders.

**How about dividend rates in 1945?**

London Life policyholders will receive the same high rate of dividends during 1945, despite the lower interest earned on investments. A further decrease in the expense rate has helped to make this possible.

**How do you account for the progress of The London Life?**

An essential factor has been its long established record for insurance at low cost to policyholders, while maintaining a strong financial position.

The public realize the advantage they gain from the Company's financial stability, and they appreciate the high reputation the members of its sales organization have earned for themselves as counsellors. The London Life selects as representatives only those who show a definite fitness for the life insurance business and then spares no efforts in training and equipping them to give sound advice.

It is the combination of these factors—low cost, public confidence and highly skilled sales service—which is the basis of the London Life's rapid and healthy growth.

A copy of the 1944 Annual Report will be mailed upon request.
