James, Third Ave., were joint hostesses at a nicely arranged party held Friday evening at the home of Mrs. George Henderson, Second Ave., in honour of Miss Kathleen Corris, who entered St. Mary's Hospital, Sept. 5th. A nice social time was enjoyed; the guest of honour was the recipient of many lovely gifts. During the evening a delicious lunch was served.

A peculiar accident happened Sunday afternoon about 3.30 p.m., which might have had more serious effects. Mrs. George Leck, 115-B First Ave., was standing in her kitchen when a bullet shot through her kitchen window. The bullet whirred past the left side of her head; she received the splinters of broken glass in her hair. The accident is believed to be the work of some careless person handling a rifle. The police are investigating the case.

Monkey Island of Socialism

By Lewis Milligan.

I have been reading a little booklet entitled "Monkey Sense," by A. T. McFarlane. It is described as "a picture story with a moral for grown-up people," and the story is written in rather clever doggerel rhyme. It begins:

"There was once a monkey island
Where the monkeys lived in ease;
For they used to feed their 'tummies
With the nuts from off the trees."
These monkeys, of course, represent human beings, and the plenty and "ease" in which they lived is supposed to represent the state of human society before the "Capitalist" arose and spoiled this little Garden of Eden by putting the "monkeys" to work collecting "coconuts," from which he got a substantial rake-off. From this

very simple beginning, according to Mr. McFarlane, all the ills of modern society have resulted.

The analogy might hold good if men were monkeys, or if they really lived originally in a state of ease and plenty and did not have to work for a living. It is quite true that there are human beings in Central Africa who have no need to work for a living. For one thing they do not wear clothes or live in houses, and their food consists almost entirely of bananas which drop into their hands from the trees.

This is apparently the kind of society which Mr. McFarlane admires, and would have us return to or adopt. As a matter of fact, Mr. McFarlane's story at the outset is a distinct compliment to the "Capitalist" monkey, whose "cunning, scheming" enabled the monkeys to gather the coconuts without climbing the trees. But Mr. McFarlane should have carried his analogy further and shown how the capitalist established industries for the manufacture of various commodities from "coconuts" and other raw materials on the island. How the standard of living of the monkeys was raised, and how this monkeyland became the centre of world trade and a world-wide Empire.

I should have stated that this story was written in England, and it is said to have been broadcast over the B. B. C. radio network for the edification of the British public in the principles of Socialism. I can readily believe that many simple-minded people would be influenced by this type of propaganda. It presents Socialism in its simplest form, as "monkey sense." Like other allegorical arguments against capitalism, this one is based in the first place on a fallacy, for early Britain can in no way be compared to a monkey island, much less its inhabitants to monkeys living in ease and plenty. An elementary knowledge of British history is enough to dispose of such nonsense.

Mr. McFarlane's reference to the capitalist as a "cunning, scheming monkey-lazy!" is surely a contradiction in words. By his own showing, it was the other monkeys who were lazy—too lazy to think and scheme for their own social betterment. But the whole story is based upon false premises—upon an over-simplification of our social and economic problems. If we start out with the idea that we were originally monkeys living solely on coconuts—or even if we assume, as another socialist story does, that we were Arabs in a desert, living on water—we can very easily build up a case against the capitalist for disturbing our primeval ease and security.

But it is not so simple as all that, as Mr. McFarlane must know right well. It is no compliment to the intelligence of the "common people" of Britain to assume that they can be deluded by such monkey literature. The logical conclusion of Mr. McFarlane's story is that industrial progress is an evil development instigated

by selfish capitalists, who, like the serpent, lured man from the happy Cocoon Garden of Socialism.

SOME STORIES

We may gaze at the same spectacle, but our reactions may be quite different. For instance, a party of tourists was climbing the Cascade Mountains, overlooking the Pacific Ocean. From the summit there was a marvellous view. The first to reach the

ridge was a clergyman. When his eyes rested upon the wide expanse of ocean he cried out, "The Lord be praised!"

Close on his heels came a dapper little stockbroker:

"Well, I'll be damned!" was all he said. —Lord Davies, Magazine Digest.
