have to give serious consideration to clearance and the actual grading of the construction of roads in the min- roads. Low costs are obtainable, as tries was demonstrable, there was an tively easy. excuse for putting off road building The Ontario government should be Dec. 11 1925 to provide Christmas cheer Magistrate Atkinson spoke during way, training ship of England's merlonger remain valid.

Comparisons may be odious but it is a striking fact that the Quebec government has not neglected road building in the mining areas, even during the war. It might be said that, for various reasons, there were more active men available in the neighboring province and in particular it may be remarked that Quebec drives roads through unoccupied territory for colonization as well as mining purposes but Ontario must realize that lack of transportation facilities is seriously hampering the development of a num-

ber of areas. We have particularly in mind that section of Ontario stretching from the T. & N. O. Railway east from Ramore or Matheson, to open the easterly extension of the Porcupine gold belt. It is a somewhat humiliating fact that if a prospector or operator wants to get into the easterly end of this section he must drive through Quebec, follow a highway which stops abruptly at the Ontario boundary. There is a lot af activity on the Ontario side of the line but there is no road from the Ontario owned railway.

has been rapidly expanding, is still without a highway connecting it with the "outside". It has depended solely on water and air transport in summer, supplemented by tractor train transport, mainly utilizing lakes, in the winter. While operations have been profitably conducted the real development of the camp has been unquestionably retarded by the lack of an allweather road to connect with the Trans-Canada highway and railway.

The necessary shipping spaces has quarters indicate that local chairmen everywhere are confident that they will reach the quota allotted them, said Mr. Birks. "A great many of them had achieved their objective by the end of last week, which had been the original date for closing the campaign. Others had not actually received all the se viccable used cinthing expected. Those families who have not made their contribution to such a humanitarian cause are urged to do so without delay-to those who have already given I would ask them to once more go over their storerooms and clothes cupboards and see if there is not something else they can spare that others can wear. It is for this double purpose that the drive has been extended, so that not a pound of clothing that would cheer the hearts and warm the bodies of our allies in the stricken countries of Europe 1s left behind."

Three Centuries Ago

A shortage of tobacco would have caused as much concern three centuries ago for the Indians of Ontario, as it would for us to-day. The Indians used a great variety of pipes, as illustrated by the collections in the Royal Ontario Museum. Many of them are of baked clay. These run the gamut squash-blossoms or tobacco-blossoms. for a strange face or creeping lizard. Still more cherished are the stone pipes, some of which bear intricate carved figures. In size they range P.O. Box 147 from tiny miniatures to large, impressive ornate pieces. They vary, also, in details of construction. In some Some delays have occurred in the the stem and bowl are carved out of this idea to their advantage.

Slashed to 8 Cents p.m.

Not only the Government but all Canadians interested in flying the Atlantic are vitally concerned about Pan American's 8-cent a mile bombshell dropped plump in the centre of the air conference in Montreal recently.

The Bombshell was the announcement by Pan American World Airways that it had slashed the one-way fare from U.S. to Britain to \$275 for single passage and \$495 for the round trip, reports The Financial Post.

This works out at about 8 cents per mile, single fare, for the 3,500 mile New York-London trip. It compares with a present transatlantic rate of \$525 or 15 cents per mile for a single Black Rose-T. B. Costain-It's the trip. Pre-war flying boat fares from U. S. to U. K. were quoted at \$375 single and \$675 round trip.
