TAKE A TIP . Care should be taken not to fill the cooker too full or wth oversized portions that will close the vent pipe when the cooker cover is sealed.

2. When the desired pressure is reached-which is indicated by a pointer on a gauge or by a slight hissing sound and movement of the weight-the heat should be lowered immediately.

Foods with short cooking times will be over-cooked unless the temperature is rapidly reduced. Some cookers may be placed in a small amount of cold water to release steam.

Because some foods, as less-tender meats, soups and the like can use longer cooking times ,instant pressure reduction is not necessary. A better result is obtained if such foods as dried beans or whole onions are allowed to drop pressure by cooling normally, as a sudden demperature change may cause splitting of the skins.

A few minutes too long in the pressure pan can cook vegetables into an unrecognizable mass.

5. The short cooking time also preserves food values by shortening the time of exposure to heat. Vitamit's B-1 and C are not destroyed in pressure-cooked foods to the same extent as they are in longer cooking. BEEF STEW WITH NOODLES

A SCHOOL is itself a problem in mathematics. When a new settlement grows up or an old one expands, someone has to do some figuring. The money has to be found for that little new school-house or that added wing to a high school crowded to the corridors.

The municipal bonds which finance the building of schools, hospitals, water-works, hydro plants, and other community projects which contribute to our national health and enlightenment, are financed to a large extent from Life Insurance funds.

Dollars you have paid in as Life Insurance premiums may already have returned to your community. Everywhere you turn this great co-operative fund is being employed in socially useful enterprises.

Of every dollar invested out of Life Insurance funds, a substantial portion goes into the solid, progressive development of Canadian communities. Other investments include government bonds public and industrial securities, farm and home mortgages, etc. This money, repre senting the thrift of the nation, creates a never-ending cycle of jobs far and wide, as well as safeguarding the future security of four million policyholders and their L-12458
