CHAPTER TWO

Last week we told the story of the town of St. Marys, which has recently acquired the full-time services of a recreational director. We told how he had sent out questionaires to the 4,000 folk of that town to learn just what they wanted in way of recreation.

This week we read in the St. Marys Journal-Argus that over 1,000 replies have been received so far - or one out of four of the men women and children of the town. Not bad

for a start.

And here is a rough idea of St. Marys' wishes in the recreational line: Some 123 wish to take up photography; 144 are interested in woodworking; 130 in needle work; 94 in nature study, 61 in stamp collecting; 97 in plastics; 42 in coin collecting.

To continue: 316 were interested and wish to participate in the 'teen-age club, which the director plans to start at the end of March; 287 were ready for dancing, 58 for dramatics, 45 wanted a book club and 190 wished seasonal parties.

In sport, 162 wished to take part in baseball, 234 in softball, 59 in track and field, 325 in swimming, 168 in tennis and 78 in lawn bowling. Others were interested in gardening, modeling, hunting, fishing, sketching, ping-pong, golf, volley-ball, etc.

The results are not all in yet. But from those already received, it is obvious that there will be a large increase in the number of "clubs" organized in St. Marys this year; a large increase in the interests in the saner pleasures of life for the people of St. Marys.

HERE'S HOW IT GOES

Evidently, and as long ago as last September, the Ontario government has had a plan for developing community recreation. According to F. L. Bartlett of the Department of Education, this is how it goes, and we quote the Collingwood Enterprise-Bulletin:

"In brief, it is a means of co-ordinating recreation in a municipality for the greater benefit of the largest number. Organizations are encouraged to work together to this end. Where a representative committee has been approved by the local council, a full-time recreational director may be engaged and the Department will pay a percentage of the salary. The program is directed entirely locally and there is no dictation from the government.

"While operating through this committee the various organizations or clubs do not lose their identity but co-ordinate their efforts."

Now we quote the Simcoe Reformer, on the same subject:

"The towns of St. Marys and Smiths Falls are the latest to join the ranks of communities employing a full-time director of recreation. The Ontario government has inaugurated a plan whereby the province pays a very substantial part of the cost of such a director's salary providing a program of recreation is mapped out and approved Organized sports activity and supervised recreation should be integral parts of the program of every progressive town today. The small outlay by the municipality required to provide a full-time director should encourage many towns to enter the plan."

Inasmuch as the town of Timmins is already paying out money for playground directors and a supervisor during the summer months, the council might consider whether this money, together with the money made available by the Ontario government for the purpose, would not do a better job if used for the expense for a full-time recreational director.

We submit the matter is worthy of enquiry and further consideration.

GARDENS FOR PEACE

The news this week shines with the word that Canada is going to tighten its belt, just a little, in order that the less fortunate in other parts of the world may have a better chance for life. There will be a little less food in Canada this year; a little more in Europe. And small as Canada's contribution may be when spread among the many millions who walk hungry this week, it may yet be enough to mean the difference between life and death.

It will mean, too, that Canada has not been altogether unmindful of its responsibility as one of the fortunate nations of the world, that in its awareness of that responsibility Canada is willing to do its part. We can all derive some satisfaction, therefore, from the dominion government's decision to ship more grain abroad, to keep less in Canada.

In the absence of an ampler supply of grain the public is being urged to interest itself in other foods, to eat a little less wheat - a little more of vegetables. Each one of us can do something to make this possible by directing our own individual habits of day-today eating. It's not a particularly difficult thing to do in a country whose larder provides such wealth of substitutes for our daily bread.

There's something else which can be done. of course. We can continue the "Victory gardens" which were part of our activity in wartime, and make them serve the needs of peace. Garden space is not so plentiful in the Camp as it is in other places. But there is enough of it to help a lot in providing food which we may enjoyably use as an alternative to the wheat which is so much needed by our friends overseas. And it may be said that among those who eat best in Canada in this coming winter will be those who plant the most vegetables this spring.

NO AXES FOR TAXES THIS YEAR

The writer of this column is no expert in municipal finance. The meanderings of the mill-rate are to him a matter of mystery.

About all he knows of taxes is that it is not the plural for tack. He has, however, the casual interest in the tax-rate which is shared by his fellow-citizens, aggravated by the nasty nosiness which has led him into newspaper work.

So this week we have been making enquires from persons suspected of being a little wiser than we are in the care and raising of tax rates. As a result, we are now betting 5-2 on an increased tax rate for 1946. Here, according to sources best forgotten, are our reasons.

Like many municipalities, Timmins has, because of the shortage of materials and manpower during the war years, left undone much of the improvements, purchases of equipment, etc., which normally she would have done. Now that the situation has eased there remains a considerable back-log of sidewalks and roads unbuilt, of sewers un-sewed, and machinery unpurchased.

Whether it might have been better to forsee this situation and maintain the tax rate during the war at levels which would have taken care of it, we know not. In any event it wasn't done, and we suspect that the sooner we set an increased tax rate and get caught up in our homework, the better it will be for the future of Timmins. We have the feeling that the necessary jump in the tax rate will cause a few nasty words about town and that these words may grow into quite longwinded paragraphs by the time next election day rolls around

But if the public desires a proper public works program for the coming year, higher taxes are inevitable - in our amateurish opinion. We have been told this week that it is not difficult to lower taxes - all you have to do is slash the public works estimates for the coming year and leave the work for next year's council to catch up on. If taxes remain the same this year, it will be largely because the council has seen fit to adopt such an attitude.

If, however, the taxes do go up (and there's lots of wise money on it) then you can be assured the council has decided that at least some of those long overdue sidewalks and roads are going to be built; that here and there, long-suffering householders will be given the services they need; and that council has decided to buy machinery with which to do it.

WAGE BOOST NEEDED?

In the light of what happened at the Toronto meeting of gentlemen representing the Mine Mill and Smelter Workers Union, at least the heading of this editorial will get read. But regardless of any injustice from which the miners may or may not be suffering, our eyes are not too blinded by tears to miss the importance of the suggestion contained in the following:

"If the idea of advancing education appeals to the people, then they must be prepared to pay teachers' salaries which compare favourably with industry," says the monthly letter of the Royal Bank of Canada. "An analysis of teachers' salaries in the Dominion shows that 74.9 per cent received less than \$1,223 per year; 49.9 per cent less than \$782 per year, and 24.9 per cent less than \$537 per year. One Province has 50 per cent of its teachers receiving less than \$482 a year; in five Provinces they receive less than \$750 a year; in three Provinces the median is higher than \$1,000 a year. An 8-hour-day workman at 50 cents an hour would earn more than \$1,000 a year."

In conclusion the letter says: "It seems to be the concensus that only by having a welleducated citizenry can the grave problems of war and peace be solved and the common welfare of the community advanced. To fulfill this service, education cannot be made up of cycles of enthusiasm punctuated with periods of inaction. It cannot consist in opening a child's mind, as one does an oyster, by force. It cannot be a mountain of snobbery, because it will bring forth a very small education mouse.

Before any of us complain too loudly of our own plight, it is sometimes comforting to think of the plight of others. In considering the pay of the average miner, compared with the wages of many others who work equally hard, in other fields, sit is sometimes interesting to ponder on who has the prior claim to make demands for better wages at this time.

MODERNIZE BUILDING BY-LAW

In regard to housing there is one job the provinces can and should do, remarks The Financial Post. "The provinces alone have power to influence their own municipalities to take a more reasonable attitude towards new building methods and materials, including prefabricated houses. If provincial premiers do not feel they can properly endorse individual proposals they can at least inspire a concerted move by municipalities to clean the deadwood out of local building by-laws.

"A thousand and one dissimilar, obsolete and obstructionist municipal building codes today plague mass-house builders and deter adoption of new building materials and methods. Depression, war, machinations of special interest and apathy of local councils have combined to thwart any worth-while program to modernize or even standardize by-laws governing design, erection and equipment of houses and buildings.

"Depression and war no longer are valid excuses. Postwar reconstruction is upon us and the national goal of high and stable level of employment demands construction volume at or near capacity for years to come. We can't achieve such volume if archaic and illassorted building by-laws continue to stand in the way."

tant statement made by Mr. Winston United States, then it is for Mr. Shaw Churchill in his Missouri speech on and the 'Friends of Russia" to tell us "The Sinews of Peace" was when he just what the Soviet is up to. drew a parallel between the present! "We might all have been spared th position of the Soviet Union with that miseries Hitler let loose on manking and we might all have been spared the without a shot being fired."

Mr. Churchill was referring to the indifference with which his repeated warnings of the Nazi menace had been received in the thirties At that time the people of the United States and most of its leaders were absolutely indifferent to what was going on in Germany, and if Mr. Churchill had dared to address an American audience on the subject he would have been howled down for his pains.

It will be recalled that in the early thirties Mr. Churchill paid a visit to the United States and Canada, and at that time he urged the necessity of a closer co-operation between the United States and the British Commonwealth,

spoke, and when he came to Toronto daughters. there was only a small audience in the Maple Leaf Gardens to listen to him. He was afterwards knocked down by

an automobile in the streets of New York. That may have been a pure accident, but in view of the decisive part in world affairs, there is a possibility that the accident was staged. At least we can say now that it was fortunate for the world that the accident was not

The tremendous bursts of applause with which Mr. Churchill's speech was punctuated in Missouri would seem to indicate that his proposals for a continuance of the alliance between the United States and the British Commonwealth would be favoured by the American people.

President Truman and the authorities of Westminister College must have been more or less acquainted beforehand with the contents of the speech, and it may be assumed that they were in general agreement with its main
