In 1886—60 years ago—the Dominion experimental farms were founded. Starting with five farms the system has since been extended to 34 farms and stations and 210 illustration stations. This system, the largest and most comprehensive of its kind in any country, is maintained, with the other Services of the Dominion Department of Agriculture, for the promotion of agriculture and the national economy of Canada.

As a result of the work carried out in the past by all the Services of the Department in co-operation with the provinces and agricultural colleges, a much greater measure of stability has been given to farming in the Dominion.

Now that the war has ended, all the Services of the Dominion Department of Agriculture—Experimental Farms, Science, Production and Marketing—visualize a broader and fuller program of usefulness to the people of Canada. The facilities of these Services are varied and extensive. Everybody in Canada is invited to take advantage of them freely. The Department is always ready to assist in any way in the advancement of the basic industry of Canada—Agriculture.
