THE "Y" WEEK

Phalanx Plays Cabogt
The Phalanx Club of the Porcupine Community YMCA had an exhibition hockey game with the Cabogt Club at the McIntyre Arena last Sunday morning. The game backfired on the Phalanx Club. The Phalanx had to lend the Cabogt several players and then the Cabogt team reinforced with Phalanx players defeated the team which was playing under the Phalanx Club colors. However, the game was thoroughly enjoyed by all and a return game is planned for this coming Sunday.

Sigma Club Work On Cards
The girls of the Sigma Club under the chairmanship of Jean Ross have undertaken to assist the Porcupine Community YMCA in its coming Financial Campaign by typing the various cards and special letters. The girls are doing this work in their spare time and have received permission to use the office facilities of the Mutual Life Assurance Company. The girls have been adding new members to their club during the past month and are also taking an active part in planning and promoting the SO-ED programs which are scheduled to begin in April.

L. H. Hanlan Writes On Poultry Raising

POULTRY RAISING IN THE DISTRICT OF COCHRANE SOUTH

Baby Chicks: One of the main changes or advancements in the poultry keeping business which has made it possible for settlers and others in this district to engage in the industry on anything like a large scale has been the successful operation of mammoth incubators by outside hatcherymen which in turn has made available at not too high a price, thousands of fair quality baby and older chicks. It has for the most part, been necessary each spring to import a sufficient number of baby or older chicks to replenish the various flocks, and also take care of any expansion contemplated. One small hatchery did sell a few hundred chicks for a year or two, but even this has discontinued. In the main it would appear that the purchasers have been fairly fortunate in the grade of chicks with which they have been supplied. Occasionally a shipment is received which does not seem to do as well as it should, but this, of course, is to be expected where fairly large numbers of chicks and also numerous hatcheries are involved. In any case it can be safely and definitely stated that the purchaser of baby chicks has much more protection than he once had. This is largely due to the various Provincial and Federal Department Policies having to do with the elimination of disease in the parent flocks supplying the eggs from which the chicks are hatched, and the sanitary and efficient management of the hatcheries concerned. It is a common opinion that on the average the hybrid pullet is a better bet for vigor, health and egg production, than is her half sister of the pure strain.

A very small percentage of the local requirements, have placed the local producers in direct competition with poultry meat, and eggs produced in other parts of the province, and also in other parts of the Dominion. This means that if the local poultryman is going to gain and retain his rightful share of this excellent local market, he must pay greater attention to, and put more time in the marketing end of his undertaking or venture.

Lack of continuity of supply of the locally produced products is perhaps the greatest cause or reason, for the trade including wholesalers, retailers, m.e.s., timber companies, and the average local consumer, turning to the imported article, and once this set-up is established, it is sometimes difficult for the local producer to get sale for his products even when he has them.

Other things being equal, however, it has been the experience of most producers of all products, that a good local domestic market is one worth getting and if possible keeping. This, of course, is particularly true when that local market is of such an extent that it could handle all of the locally produced articles.

It would thus appear that the farmers, and other poultry raisers in this district should continue to strive to meet the demand of the local market to just as great a degree as possible, and also strive to meet it with the highest quality of product possible.

MIXING FOODS O.K.

Healthful foods do not create problems just because they are mixed, say nutritionists. Mixing foods should not cause indigestion unless the two foods are naturally hard to digest when eaten by themselves.

Revellers To Mind Babies

The Revellers N-Y Club are setting up a Nursery in the YMCA quarters each Saturday from 10:00 a.m. to 5:30 p.m. This service is planned to be a convenience to mothers who must take their children with them when they shop on Saturdays. Mothers will be able to leave their children at the Nursery where they will be under supervision of the girls while they shop and then they will pick them up when they are ready to return home. Any additional information may be obtained from the YMCA Office or from Eda Torlone, president of the Revellers Club.

Y's Men Hear About Palestine

The Timmins Y's Men's Club heard a talk from Harry Birkenshaw, one of the club members, at their meeting in the Grand Hotel. Mr. Birkenshaw told about his trip through the Holy Land while serving with the Royal Navy as an officer. A very interesting part of the talk dealt with conditions under which Arabs and Jews live in Palestine and which have helped to bring about the present civil war.

It was announced at the meeting that the Board of Directors of the YMCA would meet with the Y's Men next week to make final plans for the coming Financial Campaign. A second announcement dealt with the very successful Duplicate Bridge Tournament which was held last week by the Y's Men in the YMCA. This very successful tournament will be repeated in the near future.

Golf Club To Hold Annual Meeting Soon

The annual meeting of the Timmins Golf Club will take place at Hollinger Hall, March 23, at 7:30 p.m. increasing membership and green fees. The directorate feels that in addition to the expenditures made in staging the N.O.G.A. tournament last year in Timmins, increased costs will ensue this year due to labor costs. At the present time a family membership at the local club costs \$50. The rate for men is \$35 and ladies \$20. Green fees for visitors are \$1 per day.

STRAWBERRY GUAVA

Delicious, Sweet and Spicy
This is a luscious tropical fruit which makes a useful as well as a charming and beautiful house plant. It bears both flowers and fruit at the same time. The flowers are pure white and delightfully fragrant. The fruit is about the size of a walnut, of a beautiful reddish color, and of delicious, sweet and spicy flavor. Fine for eating out of hand, and unsurpassed for making jelly. These plants are usually grown from seed and begin to bloom and bear fruit while quite small.

Confederation Life
Gives Us Four-Fold Protection"

"Yes, Sir!"

1. My wife and children will get a monthly income if I die.
2. They get double the monthly income if I should die by accident.
3. I get a monthly income if I become totally disabled through sickness or accident and the policy is kept in full force without further payment of premiums while the total disability lasts.
4. I get a monthly income for life when I reach retirement age.

"I feel that I owe a debt to the Confederation Life Representative who showed me how to get this four-fold protection."

If you, too, want four-fold protection see a Confederation Life Representative about it. He is trained to advise you wisely. Write for the booklet, "Four-Fold Protection Provides."

BEFORE YOU INSURE, CONSULT—

Give!
THE WORK OF MERCY NEVER ENDS

COURAGE, HEALING, LIFE ITSELF... TO OTHERS
Worthy indeed of generous giving is the nation-wide work of the Canadian Red Cross. There are many thousands of ill and disabled veterans needing comfort and courage . . . isolated Canadian communities depending on Red Cross Outpost Hospitals . . . men, women and children needing life-saving emergency blood transfusions. And these are but a few of the deeds of mercy you do when you give to the Red Cross.
