Works Department

News from the works department of the Township is to effect that a wire was received from Mr. Saunders of the Hydro that if South Porcupine quota of power is not met, it will be subject to a cut-off. Mr. Anderson suggests that even with all the street lights eliminated (which is being done) there still remains the fact that each individual must conserve power. It is the waste, not the use of electricity which is making it difficult to keep within the quota. The suggestions for conservation are: to avoid filling a kettle when only half the water is required. The same applies to heated bath water; and lights left burning where not being used. The situation is serious.
