### DOMINION CATERING DOINGS

It's a sad story, but now it can be told. Yours truly overheard two of the boys discussing the long jaunts they had to put in each evening to secure the comforts of life walking down to Main Camp and then way back. When I mentioned that the Millsite Commissary had been open and dispensing merchandise for the last three days, it was just too sad. Dominion's new quarters are now in full swing at the Millsite, having most up-to-date equipment.

Mr. B.V. Woodard, Superintendent of Dominion Catering Co. Ltd., spent part of last weekend here and is now with us for a short stay checking over the new equipment and quarters.

To preserve our quarters from one of man's most common enemies, FIRE, Mr. Fred Jones, our Fire Chief, gives us a word of timely advice. Watch that last cigarette before turning in -- butt it out in an ash tray and not on the floor or in a refuse container. Check the wiring on your personal electrical equipment, if defective he will be only too pleased to remedy the trouble or advise you where and how to get it in smooth working condition. For the girls, a special word of caution: DON'T leave those irons connected and walk away for a chat. Celanese, silks and most fabrics utilized in the manufacture of women's garments are highly inflammable. By paying attention to these simple rules, you will not only save your fellow man considerable grief, but you will also be taking care of your own interests.

While we're on the subject of inflammable material. - It has been drawn to our attention that a certain young man with two unmistakable features of a well-known actor, has been rushing madly around lighting the fags of a charming party at the girl's table. Tut, Tut, Clarky, watch yourself now -- fire burns you know!

Here's a scorcher: Some of our lads were trying out recording equipment in the Women's Quarters' Lounge; on returning next morning to pick up their equipment, imagine their surprise to find a record being cut -- evidently a jar had set off the delicate mechanism. It was then found out that it had recorded the awakening remarks of the gals. Quote: "Gad, wish I was a millionaire! I'd set one of those silly alarm clocks for 6:00 a.m. every morning so I could heave the silly thing out the window". "Heck, why does the Eskimo have to leave that window open every night, this is the second time my crockery has set in this glass of ice." "Gosh, I wish I hadn't taken that last one." Who hung that awful portrait over the wash stard -- Geeze! That's not a portrait, it's a mirror". "Swish, do I ever feel good this morning, hey, what am I
