PROTESTANT CHURCH COMMITTEE ENLARGED

Following the regular Protestant Church Service held in the Recreation Hall, Sunday, May 11th, a congregational meeting was held.

The meeting was opened by Fred Soughton who briefly reviewed the activities of the Protestant Church at Terrace Bay during its first six months of services which were held through the collaboration of Rev. O.G. Barrow (Anglican Church) and Rev. A. F. Lavender (United Church) both of Schreiber.

Dave McDonald spoke briefly and George Coulter read the financial report covering the six months of operation. Both were members of the committee. The three-man committee then resigned making room for a larger committee.

A committee of seven composed of five men and two women was proposed and carried. Elected to this committee were: Mrs. J. M. McCausland, Mrs. Harold Marsh, Marvin Lemon, James Isbester, Fred Soughton, Dr. McCausland and Bob Sheppard.

The minutes of the meeting were recorded by Marg. Dadds. The election was conducted by Rev. A. F. Lavender.

SAFETY AT THE CROSSING

Perhaps one of the most often seen but probably unknown men around Terrace Bay is John Sechosky. John or "Pop" as he is known to a few, keeps a constant vigil at our crossing over the C.P.R. tracks. "Pop" is out in all kinds of weather but he never shirks his duty for his own comfort as he watches out for the safety of those who use the crossing. His never-failing smile and happy greeting every time you cross the tracks makes you appreciate this man for more than the protection which his presence affords. We are happy to say that since John has held this all-important post, no accidents have occurred at the crossing.

We feel sure that this record will be maintained while you are on duty "Pop" and therefore we thank you for a job well done and wish you continued success in the future.

To those who use the crossing we would just like to note "When John signals STOP he means it."

WOODLANDS LOG

By Len Christianson

There are plenty of signs of spring in the woods regardless of cold weather. Small flocks of geese and many ducks have been seen on the Aquasabon River which is open and free of ice. The inland lakes have been frozen over so the ducks and geese have been forced to land on running water. The rise and fall of the temperature in the past month has bothered the hawks. Willie Heinrich saw some hawks fly up to a smoldering fire one frosty morning to get warm. When the men came along, the hawks flew away but returned to the fire when the men left. Usually hawks are afraid of fire -- maybe they are becoming domesticated.

The Hydro Road to camps up the river is in need of considerable maintenance. Frost is coming out of the ground and small streams are becoming big streams. It's no place for cars or light trucks at the present time.
