

Highlights of the evening's entertainment were two skits: "Terrace Bay Divided", featuring J.T. Corbett as Senator Limberkey; and, "John's Other Mother", starring Dave Stanley as the reader of commercials for M.U.D. -- "Mud", the soap that does nothing.

When the dance ended at 2:00 p.m., guests reluctantly departed and demands were heard on all sides for another on the same scale in the near future.

The financial statement for the Prom will appear in next week's edition of the news.

Our thanks go out to all who helped to make the "Prom" a smash success.

#### SNACK BAR OPENED AT RECREATION CENTRE

Terrace Bay now boasts a Snack Bar where, during the evening hours, a person can satisfy, to some extent, at least the wants of the inner man for a bit to eat after the show or ball game. While all items may not be for sale all of the time, the following items will generally be available: Assorted sandwiches and cakes; soft drinks, tea, coffee and milk; ice cream; fresh fruit (in season). In the snack bar, newspapers and a large variety of magazines may also be purchased as well as cigars, cigarettes, tobacco and chocolate bars. Other items may be added from time to time.

At present, the hours are from 6:00 p.m. to 11:00 p.m. daily, with additional hours Saturday, Sunday and holidays -- 2:00 p.m. to 5:00 p.m.

All profits above a fixed percentage will go into the Recreation Fund and will be used to develop additional recreational activities at Terrace Bay.

#### ONTARIO CONSTRUCTION COMPANY NEWS

All good Ontario Construction Company men rejoiced last Sunday afternoon as the Ontario Construction Company's first team crushed the Hydro Kilowatts 6-3 in one of the opening league games of the season. Behind Big Jim Kearns' superb hurling, the big bats of Jerry Ferguson and Gord McKnight paved the way for an easy victory. Latest Ontario Construction Company 'find' is Al. Graham of the concrete gang, who played a bang-up game at second base.

Monday afternoon, a good time was had by all at the concrete pouring. Aarnio was reported later, to have been seen pushing the vibrator towards Lake Superior.

Truman Caverlee, our genial carpenter, is quoted as saying that he will never be out of a job as long as the present concrete gang is around. Truman is the man who repairs the breaks.

#### SOFTBALL TROPHY NEEDED

Now that our Softball season is under way, with eleven teams entered in the two mass leagues sponsored by the Terrace Bay Softball Association, the need is now apparent for a trophy which can be used as an incentive to the team. Perhaps some form of recognition should also be the lot of those players who constitute the championship team which will emerge from our first season of organized Softball at Terrace Bay. The trophy could be competed for annually. The players' awards could vary from year to year.

The Editor-in-Chief of the Terrace Bay News will be happy to answer any questions from any individual or group interested in assisting the above cause.

#### WHO'S WHO AROUND THE JOB

R.P. "Dick Rigby" - Superintendent, Ontario Construction Company.

This week, our who's who spotlight falls on the smiling face of genial R.P. "Dick" Rigby, Superintendent of Ontario Construction Company, the contractors responsible for much of the work which has contributed to the present well-developed status of our Townsite. Dick (who has been around the Terrace Bay project since back in June, 1946, when Ontario started to dig sewer and water lines and pour concrete basements for our houses) is a product of Southern Ontario's thriving metropolis, St. Catharines, where he first saw the light of day.

It's quite natural that Dick Rigby should be in the construction business. His grandfather built the first tube (underground subway) from Waterloo to Picidilly in London, England.

Dick's father started a Canadian Branch of his father's English construction business before the first great war and since that time, Ontario Construction Company Limited has forged steadily ahead. They have the honour of having removed the first shovel load of earth back in the early '20's from what is now the famous Welland Ship Canal which connects Lake Erie with
