

Visitors to Terrace Bay from Longlac, Ontario, were Mr. Ira Campbell and Mr. A.D.K. Switzer of our Longlac, Ontario, Woodlands Department. They were here on business concerning river improvements and clearing operations. As the job progresses we will likely be seeing more of these two gentlemen.

John Smith has been transferred to Terrace Bay Woodlands Department for the summer months. He will be scaling and measuring clearing areas and also doing some instrument work on the future reservoir.

Don Campbell is starting on the job of building up the firewood supply for Terrace Bay and hopes to be functioning to capacity in a couple of weeks. If it's a cold winter or a mild winter, it's immaterial to him. He knows where he can get the wherewithal to keep all and sundry warm.

Despite the damp weather of the past two days, this is very bad weather for forest fires. Please keep that in mind at all times. This sandy soil dries up moisture quickly.
