STORM WINDOWS

Attention is drawn to Clause 15 of the recently issued "Information and Regulations for Townsite Tenants" which states that "putting up and taking off storm windows is the responsibility of the tenant".

When changing storm windows and screens, it should be noted that each sash is stamped with the house number followed by the number of the sash. The sash number should correspond with a number stamped on the window frame, into which the sash is being fitted. By following these simple instructions much trouble should be eliminated.

TO ALL TOWNSITE RESIDENTS:

Burial within the Townsite of fish, the remains of fish or garbage of any kind is prohibited.

Garbage should be kept separate from ashes and all garbage wrapped and placed in covered metal containers.

Garbage and ashes are collected regularly Wednesday and Saturday of each week, at which time containers should be placed beside roads for collection of contents.
