

CALLING EVERYONE INTERESTED IN CURLING

There is a definite possibility that facilities for Curling might be developed at Terrace Bay if there is sufficient interest in this sport. In order to determine the extent of the interest, all curlers or prospective curlers are urged to attend a general meeting which will be held at the Personnel Office in the Lower Camp on Tuesday November 4th at 7:30 p.m. If you are interested in seeing Curling established at Terrace Bay, don't fail to attend.

FROM THE TERRACE BAY RECORDS2 Years Ago

The entire Terrace Bay locality was nothing but a wooded area where surveys were being made relative to the selection of a site for the present project.

18 Months Ago

In addition to 2 original camp buildings, 5 additional portable buildings had been erected.

Dishes, cutlery, cooking utensils, beds and bedding were being ordered sufficient for a 100-man camp. Dining room tables and benches were being constructed "on the spot" by our carpenters.

A stable had been erected and one team of horses had arrived from the Woodlands Dept. at LongLac Ontario, after a 7 hour truck ride.

A three-ton army truck was due to arrive. Diamond drilling continued as a means of probing soil conditions.

12 Months Ago

In the Townsite 38 houses had been erected and finishing carpenters were busy completing the first half dozen. Three houses had received their exterior pine coat of paint. The Power House in Townsite was ready for use and a Motor grader had been placed in use on the roads.

At the Millsite, all steel for Pulp Storage building had been erected by Canada Bridge and the steel gang had left Terrace Bay. Framing of the building had begun. The survey of the Blackbird Creek sewer line continued.

At Intake Bay, on Lake Superior, the location of the pumphouse had been decided.

Throughout the project, approximately 400 persons were at work.
