

MANY THANKS TO ALL WHO ASSISTED

The 12" water main from the Aquasabon River to the foot of the hill towards the mill was completely filled with ice which broke the 12" cast iron pipe. The failure of the pipe cut off our sprinkler systems and the source of supply of water for fire protection for the Millsite area.

As soon as the break was discovered Friday noon, December 12th, the complete Fraser Brace force participated in the repair. Repairs started Friday afternoon and were continuous until Sunday noon at which time 850 feet of 6" steel pipe had been laid enclosed in a 3' wooden box filled with sawdust. The Hydro came to our rescue with a portable boiler which supplied steam heat for the temporary water line. We were without fire protection for about 48 hours.

We would like to express our appreciation to the Fraser Brace organization and the Hydro for their hearty co-operation in helping us out of serious trouble. Fortunately, no fires occurred during the period and the crisis was averted with very little loss of time during working hours.

MEDICAL DEPARTMENT HOURS

Starting Monday, December 22nd, and continuing to January 5th, the Medical Department will have office hours from 9 - 10 a.m. and 3 - 4 p.m. excepting Sunday hours which will be as usual, 10:30 a.m. to 12:00 noon. This, of course, does not include emergencies for which a Doctor will be available at all times.

SPECIAL C.P.R. TRAINS

To accommodate Christmas travel, special trains with baggage and day coaches only will operate on the following schedule Sunday, December 21st, and on Tuesday, December 23rd. These trains will make connections with regular Montreal and Toronto trains at Sudbury.

Leave Schreiber 9:00 a.m.; arrive Hydro 9:11 a.m.; arrive Terrace Bay 9:15 a.m.
Arrive Sudbury, 9:30 p.m.

Since the regular trains on these dates will undoubtedly be overcrowded, all passengers are requested to board the specials on these dates. This schedule is made up for the accommodation of Hydro, Terrace Bay and Marathon passengers.

FIRE CHIEF MAITLAND URGES CAUTION
DURING HOLIDAY SEASON

Christmas is near once more and with it comes a joyous time to most of us, but sometimes we do not realize that new and different fire hazards come into our home along with all the good cheer that represents the Christmas spirit. Great care should be taken with Christmas trees. Lighting trees with electric lights, doesn't completely eliminate the fire hazard. Makeshift wiring should be avoided. Tinsel "icicles" can short circuit bare wiring and start fires. Inflammable decorations such as paper "dood dads" and cotton snow should not be used.

Stand the tree in a box of damp sand, this is a safe practice and the needles will not fall as readily.

Dispose of christmas wrappings as soon as possible - they are a fire hazard.

Keep a fire extinguisher handy, and as the Dominion Fire Commissioner urges on his current Christmas card - "Have a Merry Christmas and a Happy New Year - but DON'T burn the house down".
