WHAT THEY'RE SAYING ABOUT TERRACE BAY

Pulp and Paper Journal  
(Jan. 1948 Issue)

(The Production and Management Journal of the North American Pulp and Paper Industry).

"Probably nowhere in Canada at the present time is there such a concentration of brand-new industrial construction as PULP AND PAPER has witnessed at Terrace Bay, and the most notable feature of all is the speed with which this section of Northern Ontario wilderness has been transformed into a busy community. ... The townsite's natural charm has been retained by the company's wise policy of keeping as many as possible of the original trees standing. The effect has been to give infant Terrace Bay townsite the cool, shady and settled atmosphere of a long established town in summertime: the picturesque appearance of a Christmas card village in winter."

ATTENTION ALL SKIERS!

Skiing conditions at present are excellent. We would therefore like to draw the attention of all lovers of the hickory art that there is a quarter mile run cut through the bush just east of the Fire Break.
