HOCKEY THRILLERS BEING PLAYED IN HOUSE LEAGUE SEMI-FINALS

Last night (Wed. Feb. 25th) a crowd of more than 100 saw the Fraser Brace hockey team emerge on the long end of a 3 - 2 score in a semi-final game with the Office Staff. This game, the first defeat for the Office in the series, gave Fraser Brace possession of top rung for the time being at least, although both Mechanics and Office have 2 games in hand. If the weatherman continues now to string along with no further snow storms, the Finals should be completed by the end of next week.

As the scores in all the semi-final games indicate, its anybody's series even yet, and the boys are playing a brand of hockey that really should draw much larger crowds than have been attending the games. Many of the hockey players themselves helped to build lean-to shelters for the protection of spectators. These shelters are located on both sides of the rink. If you want to see a good hockey game, check the schedules below and plan to give active support to your favourite team by actually doing a little "rooting" from the sidelines...

HOUSE LEAGUE HOCKEY SEMI-FINALS

- Standings to Feb. 26, 1948 -

	<u>Played</u>	<u>Won</u>	<u>Lost</u>	<u>Points</u>
Fraser Brace	4	2	2	4
Mechanics	2	1	1	2
Office	2	1	1	2

Scores to Date

Fraser Brace	4	Mechanics	1
Office	4	Fraser Brace	2
Mechanics	4	Fraser Brace	2
Fraser Brace	3	Office	2

GAMES COMING UP

Friday Feb. 27th - 8:00 p.m. Mechanics vs. Office Staff
Sunday Feb. 29th - 10:30 a.m. Office Staff vs. Mechanics (postponed from Feb. 22nd)

FINALS

Unless a tie occurs in the Semi-finals which will require sudden death games, the 2 out of 3 Finals will be played Monday and Wednesday March 1st and 3rd and Friday March 5th if necessary.

NORTH SHORE HOCKEY LEAGUE PLAYOFFS

As we go to press, no information is available regarding playoffs in the North Shore League which are scheduled to get under way in the near future.

In the only game played during the past week, Terrace Bay scored a 13 - 0 shutout over Hydro #1.

PILING MATERIALS

Poorly piled materials anywhere on the job are dangerous.

A safe pile of material cannot topple over on you or fall on others. Give each pile a firm foundation and start it right..... Do not pile materials too high for safe lifting and safe handling..... Never obstruct the path to hydrants or fire fighting equipment..... Block round objects such as pipe and drums..... so they cannot roll.

IF YOU SEE A DANGEROUS CONDITION REPORT IT TO YOUR SUPERVISOR
