THE REASON FOR TERRACE BAY POWER INTERRUPTIONS

Elsewhere in this issue there appears a notice to the effect that on Sunday August

1st, there will be another power interruption at Terrace Bay between the hours of 8:00 a.m. and 4:00 p.m. In view of this lengthy shutdown, and the fact that numerous power interruptions have occurred during the past six weeks, particularly on Sundays, an explanation is in order. In the first place, power interruptions have been scheduled on Sundays, since on that day they create the least interference throughout the project as a whole. Secondly, the interruptions have been necessary due to the preparation required for a change-over from the temporary to the permanent power supply lines. Weather permitting, this change-over will take place Sunday August 1st.

Up to the present time, the Townsite has been supplied with power from the temporary sub-station in the mill area, the power for which has come from Cameron Falls over the 110,000 volt transmission lines of the Hydro Electric's Thunder Bay System.

Under the permanent set-up the mill will continue to draw power over the same transmission lines as those now in use, since power from the Aguasabon generating station will feed into these lines. The recently completed sub-station at the Millsite will replace the temporary station used to date.

Power for the Townsite (also from the Hydro's Thunder Bay System) will come, however, directly from the Aguasabon generating station once it is in operation, to a small transformer station in the Townsite, located on Highway #17 just west of the hotel area. From this station, power will be distributed through the town.

It is interesting to note that once power is delivered by the Hydro Electric Power Commission to the sub-station in the town, distribution of the power throughout the Townsite becomes the responsibility of the municipality of Terrace Bay, and as many people know, municipal electric systems operate under The Power Commission Act on a non profit basis.

Despite the inconvenience of the present power interruptions, Terrace Bay "old timers" (of 1946 and early '47 status) smile as they recall the fact that "in the early days" householders cooked meals on a scheduled basis, since power output from the diesel generating unit then in use was not sufficient to allow everyone to use electric stoves at the same time.

TERRACE BAY VISITORS

(Under this heading each week we will be pleased to publish the names of Terrace Bay visitors, providing the information reaches the Personnel Office not later than Tuesday evening.)

o o o

Recent visitors at the home of Mr. and Mrs. George Coulter were Mr. and Mrs. W. F. Cook of Neenah, Wisconsin, formerly of Kapuskasing, Ontario.

o o o

Dr. and Mrs. Lawrence Sheldon and their daughter Nancy Ann all of Dallas, Texas, were recent visitors at the home of Mr. and Mrs. T. C. Epps.

o o o

Mr. and Mrs. Ralph Davidson and Mr. and Mrs. Henry Wagner of Niagara, Wisconsin, early this week visited at the home of Mr. and Mrs. Ronald Faust. Both Ralph and Henry are associated with Kimberly-Clark's Woods Department and prior to returning home expect to visit LongLac, Ontario.

o o o

Visiting at the home of Mr. and Mrs. Joseph Wig are Joe's father Joseph Wig and sister Virginia of Milwaukee, Wisconsin.

SYMPATHY IS EXTENDED News has reached us of the passing of Walter Stokes, father of Colleen Stokes, switchboard operator for LongLac Pulp and Paper Co. Mr. Stokes, a C.P.R. conductor, had resided in Schreiber for years. Colleen was on vacation when her father passed away at St. Joseph's Hospital, Port Arthur. Our deepest sympathy is extended to Colleen, immediate relatives and friends.
