EDUCATIONAL WEEK The week of November 14th has been set aside as "Educational Week" in the Province of Ontario, and throughout most of the schools special programs will be held. Here at Terrace Bay, due to the handicap under which teachers are working because of the present incomplete condition of the school, observance of "Educational Week" is not practical at this time. Plans are being formulated, however, for a special program to be staged when the school building has been completed, and for this year the program will substitute for that usually held during "Educational Week". Details will be announced as soon as plans for the program are completed.

HOCKEY NEWS As indicated in "Terrace Bay News" last week, the newly elected Hockey Executive is moving into high gear and plans being developed should result in a good season during '48 - '49. Some 25 hockey players have now indicated their interest in a house league which will be established by having team Captains choose their teams from players who are interested in participating in the house league brand of "puck chasing". Those who have not already done so should leave their names with any one of the following: Bill Borsum, Harold Marsh, Eldon Marostica, Dave McDonald, Harry Ganja or Fred Soughton.

As minor hockey representative on the Association's executive, Dave McDonald will be contacting the school principal Clarence Smith with a view to developing hockey teams among townsite youngsters. Already a number of hockey players have indicated their interest in coaching minor teams and this should augur well for the future of hockey in this new community.

LOST IN A FOG The recent fog which has blanketed much of Canada and the northern part of the United States has produced many peculiar conditions. Under such conditions strange stories emerge. Locally, Malcolm Spidell, famed "boss of the river drive", has come up with a tale which may or may not fall into the "fish story" class. We'll just tell the story briefly and leave it to our readers to judge.

Two or three days ago when the "pea soup" fog was at its thickest, Malcolm and a couple of river men were edging along Hays Lake in one of the boats used in the drives. The boat, equipped for moving through and over logs is known as a "Gaiter". In the thickness of the fog, the boys lost their way and suddenly realized that the boat was no longer in the water when it bumped into a big tree at least 500 feet from the lake shore. And as if that was not enough, Malcolm asserts that the fog was so thick it took almost two hours to relocate Hays Lake.
