The above accident record places our mill 11th with 22 mills competing in the Class "A" Division of the Safety Association Contest. There's lots of room up the ladder, however, so let's make every effort to reduce accidents. Since this accident statement was prepared, three additional accidents have occurred to LongLac employees, bringing our total to eight for this year. Accidents hurt, they hurt in many ways. Apart from the physical suffering, they cause loss of pay, and often permanent disability. Sometimes our future plans have to be entirely changed because of an accident. When accidents occur, nobody wins, so let's play it safe!

COMMUNITY RECREATION PROGRAM Without labouring the point, it is probably important to take some space in this week's issue of Terrace Bay News to reiterate some of the things which have already been published regarding the Community Recreation Program now being developed at Terrace Bay.

The first meeting of the Community Recreation Committee is scheduled for Monday, April 18th, at 7:30 p.m. in the Community Hall. Prior to that time each organization in the Community has been requested to elect their representative to the Advisory Council. This will mean a special effort on the part of the Executive Officers of each organization to see that the necessary steps are taken to assure that their particular organization is given a voice on the Committee. Even if an organization is interested in nothing more than the use of facilities like the Community Hall or Recreation Hall it will be important for that organization to have the representation to which it is entitled in order that requests may be properly presented. Apart from this, the ideas of persons representing all the recreational and service organizations in the Community will undoubtedly give us a broader type of program which will in turn draw many additional people into active participation in community recreation.

And so it is that we again urge full co-operation from all organizations and persons to whom the operation of our new Community Recreation Program is and will be entrusted, and in the final analysis that really means each and every individual at Terrace Bay for through the elected representatives from each organization, everyone will have the opportunity of having their ideas presented to the Committee and we feel sure that the representatives whose names will be published as soon as they are known, will welcome any suggestions which anyone may feel disposed to make.
