A MESSAGE FROM OUR FIRE CHIEF Gasoline - a dangerous giant: 1. Always remember that you must take no chances with gasoline; it is one of the most dangerous substances in common use. 2. It must always be kept in tightly fastened cans; never in glass bottles. 3. It should never be uncovered within the house, nor at any point where it's fumes can travel to an open flame. 4. Do not use it for cleaning; get a safe cleaning preparation. 5. Gasoline in quantity should be kept in underground tanks. 6. No one should be allowed to smoke in a Garage. 7. No one should be allowed to smoke in an automobile while it's gasoline tank is being filled.

Should one be so unfortunate as to have a gasoline or kerosene fire occur in a garage, or house, earth or sand can be used to smother it, although the use of a chemical extinguisher is even better.

Water, applied as a spray, can be used, but never as a forceful stream, because this would scatter the flaming fluid.

PART TIME HELP REQUIRED From time to time there is a requirement for assistance on a part-time basis in either offices or hotel. This covers work as stenographer, typist, waitress, room maid, etc. The Personnel Department of Longlac Pulp and Paper Company Limited will be glad to list names of persons interested in such future work. Call Local 15 or drop in personally at the office in the North Camp.

ST. MARTIN'S MEN'S SMOKER Last evening the men of the town had themselves an evening. The smoker got underway shortly after 8:00 p.m. and ended up in the wee small hours of the morning. The evening's fun consisted of games, songs and a real "stag" luncheon served buffet style. This morning, many local men are congratulating their fellow men on their "hale and hearty" appearances.

OUR FIRST ANNIVERSARY How many of us remembered that just one year ago (November 8, 1948) our mill came into production. As it is the means of livelihood, directly or indirectly for all the citizens of this modern community, we might pause to look back at the first year of production.

We are all proud of our record of production despite all the "gremlins" and "kinks" that had to be unsnarled as we went along. One of the most important factors in our record to date, both in production and safety, has been the excellent "human relations" enjoyed by all who work here - the fact that we all feel we're working with the operators and supervisors, not just for them. It is by keeping this uppermost in mind that by Nov. 8, 1950, we'll be able to pause once more, throw out our chests, and say: "A better production record, a better safety record, a better mill to work in than this time last year!"

Let's all work toward that end. Thanks, everyone in Terrace Bay, for your admirable work in community building and in Production with Safety.
