

TOWN TID BITS It is with a reluctant goodbye that we say Adios to Lorne Woodard, the genial manager of Dominion Catering. Lorne has suddenly been transferred to a scene familiar to him from his Army days, Camp Borden. After a short stay there, it is quite possible that he may be leaving the East to enjoy the sunny climes of the West Coast. In the meantime, while Lorne is getting settled, Mrs. Woodard and the baby will remain with us.

The News joins in with all of the group and individuals who had the pleasure of his kind co-operation on any matter which he could help with, in saying Thanks a Million, Lorne - somebody's gain is our loss.

Lockie Lalonde came close to being the only resident to make a perfect score on the Bowling Alleys when he rolled a 426 game. Lockie rolled 11 consecutive strikes and a spare on the last frame. Hearty congrats - ole boy.

Dick Hanson and Ralph Zachow have returned to Neenah after being with us for a short while. Dick was working on improvements on the Woodyard conveyor while Ralph had a much longer stay doing general advising in Maintenance.

Mr. D. MacDonald, Chief Boiler Inspector who was with us during shutdown, has returned to Toronto.

Messrs. R. L. Kennedy and A. T. Butler of the Dept. of Municipal Affairs have been making a routine visit with Frank Strutt at the Improvement District Office.

Harry Pierce, Chief Planner of Kimberly Clark Corporation, who is a current visitor addressed the Supervisors at the Monthly Supper last night. It is believed that he will also try to straighten out W. C. (Head-Pin) Borsum before he leaves town.

Frank Raw also of Kimberly Clark Corporation, Neenah, is currently with us to study the water problem.

Mr. Losier of Combustion Engineering spent a few days with us to supervise the installation of the bottom of the Recovery Boiler and presently Messrs. R. R. Brooks and J. L. Griffith of Foster-Wheeler Limited are here to observe the test run on this.

IN THE DOG HOUSE

(Reserved for units with less than 100 safe days)

Structural - 46

Mechanical - 4

A two day lost-time accident near the end of the recent Maintenance Shutdown broke the "Mechanical" record of 244 safe days and gave us our second "lost-timer" of the year, based on National Safety Council Standards.
