CREDIT UNION NEWS Mothers! - In order to provide better things such as clothes, etc., for your children, you must have the money. This is a true statement isn't it? The Federal Government realizes this and so they pay you a Baby Bonus to help provide better things for your Kiddies. The Credit Union now wishes to show you how to stretch this money and thus provide more. If you will start now to put this Baby Bonus money directly into the Credit Union in your own share account you will thus build up a share capital within the next few months. Then, during the summer, or next fall, or whenever the need arises, if you will take out a loan for sufficient money to buy, say a complete outfit for a child, -- you will actually save money, because:-

(1) You will have the cash and thus you will be able to either "Shop" around or else make a beneficial deal with a merchant. (You won't have to pay carrying charges on a charge or deferred account).

(2) Your rate of interest on this loan will be cheaper than you will be able to find elsewhere (one percent per month on the unpaid balance) -- if you don't believe us, get out that mail order catalogue and check up.

(3) To pay off this loan you can turn over the subsequent Baby Bonus cheques to the Credit Union. When the loan is paid off you'll find that you will have the "Saving" habit and thus you'll find it easy to continue turning over the Cheques as they come in and thus further build up your share capital.

(4) When the loan is paid off you'll have the clothes that you bought, plus the money that you started with. (The Share Capital).

(5) The full amount of your share capital is still in the Credit Union and has been all along and is earning a dividend payable at the end of the year.
