5 PIN BOWLING

With the third series started, teams in all leagues are making a fighting effort to gain a berth in the playoffs which follow the current series.

A quote from Chisholm: "It seems that those four teams now in the Men's Champions are day workers - we should have a further 50 to our handicap! Well, how come the day workers headed by Borsum with Wig as anchor man are not one of these lucky teams?"

The four teams Alex makes reference to are John Maurstad's Kakabekas, Clarence Buck's Wings, Sax. Lundberg's Royals, and Don Boudreau's Engineers.

These captains accomplished the money making bracket with the assistance of "low average" bowlers bowling "over their head".

The Kakabekas are worthy of some recognition in as much as they led the first series by $1\frac{1}{2}$ points and the second series by 14 points. Are they going up? Who has the team that can stop this formidable aggregation? It is suggested to Campbell that he bring that "285" average from the mixed league to the men's and help his Kakabekas. No inspiration in the men's league?

In the Mixed League further interest is "riding high"; this can be noted from the "teeter totter" in who's first each week. The four teams thus far competing in the playoffs to come are Olyve Harrison's Pin Boys, Gord Paget's Schemers, J. Johnston's H.B.C., Bill Louk's Mad Musicians.

In the Ladies League V. Wainikka, captain of the Hippity Hops hopped in first in the first series. This same performance was stopped by Elsie Ostling's Misfits in the second series.

With the Commercials the H.B. entry of Jean Megraw won the first series.

The Dominion Catering under Alphonse, is leading the second series. This was too much of a shock to Alphonse and his familiar laugh has hit an octave higher.

Once again we stress the constitution with regard to teams bowling their scheduled games in advance should they not be available on night of play.

Should you believe you'll be "on" either in leagues or open bowling, deposit 10¢ before the game with Leon who will register you for the week's highest bowling prize. Through this you may win a cash prize of 40% of the total intake and 60% goes to the Association. This will be the Association's only means of trying to make money for our
