

IT PAYS TO DRESS WELL

Your work place has been made as safe as the engineers can make it. That built-in safety is your first line of defense--the planning put into the materials and tools and machines you work with.

But engineering can't do the whole job -- you have to take it from there. Wear safer clothing...use personal protective equipment, and you'll have real protection!

Wear canvas gloves...for handling lumber or wood scrap...for metal strap hazards... for general rough work.

Wear leather gloves (or pads of reinforced canvas)...for sheet metal...for castings...for sheet glass.

Use rubber gloves...for electrical work ...in handling chemicals...

Use asbestos, wool or metal gloves... for hot or sharp objects...for special jobs.

NOTE ON GLOVES:

Use only tested rubber gloves, and canvas gloves in good condition.

Do not wear metal reinforced gloves around electrical equipment.

Never wear gloves around moving machine parts!

SAFETY SHOES are inexpensive, good-looking and guaranteed to keep you smiling if a crate or a casting should fall on your foot.

Wherever something heavy can drop on your feet--and that's almost anywhere---wear safety shoes.

Around electrical hazards, you may need anti-spark shoes; on wet floors, anti-slip shoes.

GOGGLES are wonderful instruments. Some are light and flexible and look like ordinary glasses. Others are rugged, and give complete protection from splashing chemicals, welding glare, or flying bits of steel.

You need goggles for chipping, grinding, welding and cutting operations. You need goggles where sawdust flies, where chemicals can splash or spray, where metal chips can harm your eyes.

On some work--light buffing and polishing, for instance--a face shield may do instead. Follow your instructions on the kind of face protection, and never make an exception---use it every time you need it!

If other special equipment like a hard hat or respirator is provided for your job, wear it.

Safety clothing will not fail you in an emergency if you have not failed it. Give safety equipment the care it deserves.

SAFETY IS SOMETHING YOU CAN WEAR, TOO.

BADMINTON NEWS

An excellent time was had by all at the 2nd Annual Two Day N.S.B.L. Open Tournament held at Marathon last weekend. Results in all events are as follows:

LADIES SINGLESSemi-Finals

R. McDonald (Marathon) defeated H. Scott (Terrace Bay) 2 straight.

H. Darcy (Schreiber) defeated O. Harrison (T. Bay) 2 straight.

Finals

R. McDonald defeated H. Darcy - 2 straight

LADIES DOUBLESSemi-Finals

O. Harrison (T.Bay) and R. McDonald (Mar.) defeated J. Whent and H. Darcy (Schreiber) 2 straight.

D. Dalzell and H. Scott (T.Bay) defeated L. Morgan (White River) and L. Christensen (Schreiber) 2 straight.

Finals

O. Harrison and R. McDonald defeated Dot Dalzell and H. Scott - 2 out of 3

MIXED DOUBLESSemi-Finals

H. Gellert and H. Darcy (S) defeated C. Buck and D. Dalzell (T.B) 2 out of 3

E. Carswell and L. Ridell (S) defeated B. Smith and E. Krisson (M) 2 straight.

Finals

H. Gellert & H. Darcy defeated E. Carswell and L. Ridell - 2 straight.

MEN'S DOUBLESSemi-finals

E. Carswell & H. Gellert (S) defeated C. Krisson and B. Smith (M) 2 straight.

G. Paget and R. Stachiw (T.B) defeated B. Jordan and D. Croteau (M) 2 straight.

Finals

E. Carswell and H. Gellert defeated G. Paget and R. Stachiw - 2 out of 3.

MEN'S SINGLESSemi-finals

G. Paget (T.B.) defeated H. Gellert (S) 2 out of 3.

E. Carswell (S) defeated C. Buck (T.B) - 2 straight.

Finals

G. Paget defeated E. Carswell 2 out of 3.
