

CEREMONY TO MARK PRESENTATION OF NATIONAL
SAFETY COUNCIL AWARDS

A special presentation ceremony is slated to be staged at the Mill Entrance on Friday afternoon August 1st at 4:00 p.m. when LongLac Pulp and Paper Company will officially receive a "Certificate of Achievement" and an "Award of Merit." Both are National Safety Council awards. They will be presented by J. Fred Berry a Past General Chairman and member of the National Safety Council's Pulp and Paper Section Executive Committee. Mr. Berry is Personnel Manager of Alton Box Board Company, Alton, Illinois.

LongLac's accident prevention experience at Terrace Bay was of such a nature during 1951 that it was recognized by the National Safety Council under a new plan set up by its Industrial Conference. The Company qualified for the "Award of Merit" (second highest award now given by the National Safety Council to industry) with a frequency rate of 3.5 (72% better than par) and a severity rate of .11 which bettered par by 90%. The "Award of Merit" will be accepted at the August 1st ceremony by LongLac's Mill Manager, D.C. Porter.

The "Certificate of Achievement" was won in the 1951 Paper Industry Safety Contest sponsored by the National Safety Council's Pulp and Paper Section. It will be accepted by Dan Gillis, President of Local 665, International Brotherhood of Pulp Sulphite and Paper Mill Workers.

Arrangements are being made so that all LongLac employees may attend the ceremony who can be spared from their regular duties. And the ceremony has been planned for 4:00 p.m. at a shift change in order that shift workers who so desire may attend. A cordial invitation is also extended to everyone in the Townsite to be present.

Proceedings will include raising an "Award of Merit" pennant to the top of the Jumbo Bulletin Board flag pole.

Following the ceremony, as a memento "Award of Merit" key chains will be distributed to all LongLac employees by their foremen.

A psychiatrist, says Efficiency magazine, in questioning a patient asked, "What would you say is the difference between a little boy and a dwarf?"

"Well, there might be a lot of difference," the patient answered.

"What, for instance?" asked the psychiatrist encouragingly.

"The dwarf might be a girl," the patient observed.

Pupils in a class in grade school were discussing the different meanings the word "boom" could have. The children mentioned booms made by explosions, log booms, and the like.

"Then," said one pupil, "there was the one that Clancy lowered."
