LARGEST CIRCULATION IN TERRACE BAY

September 16th, 1952.

badminton season re-opens

The Terrace Bay Badminton Club held a meeting on Monday night and elected the following officers for the season:

Clarence Buck - President
Olyve Harrison - Vice-President
Dave Locking - Secretary-Treasurer
Pat Honer & Bill Borsum - Executive

Members.

Badminton season started last night at 7:00 PM. The same nights of play as last year are in effect, namely Wednesday and Thursday night from 7:00 to 11:00 and Sunday afternoon from 1 to 5. So come on out, folks, and let's get a real good start this season.

KIWANIS

Last year the members of the Kiwanis Club rendered a real service to the community by selling and distributing to the residents of Terrace Bay boxes of delicious British Columbia Apples.

This effort was appreciated so much by those purchasing apples last year that the Club is undertaking the same service again this year.

Before too long you will be called on by a member of the club to receive your order which will be delivered on arrival of apples early in October.

You may order a box of Fancy Apples priced at \$5.00, a box of Cees to sell at \$4.65 or a Junior Box of Fancy grade, which you will be able to buy for \$2.75.

X-RAY CLINIC

The X-Ray Clinic will be set up and operating near the Post Office on September 24th and 25th. It is the aim of the Ontario Department of Health to X-ray all persons in Terrace Bay over 12 years of age, not attending school. School pupils will be scheduled through their teacher.

You should get a free chest x-ray because in its early stages, T.B. is accompanied by no symptoms and x-ray is the only means of early diagnosis. If found in its early stages, T.B. can be cured in a short time.

Hours at the clinic will be 10:00 AM to 12:00 noon, 2:00 PM to 5:00 PM and 7:00 PM to 10:00 PM. It is free to all residents.

Here are the answers to your questions about this service.

Q. I am healthy - why should I have a chest X-ray?

A. Early tuberculosis is curable but gives no warning. The danger signs of tuberculosis are usually NOT symptoms of EARLY tuberculosis but of more advanced disease. A chest X-ray will show tuberculosis in its early stage.

Q. I had a chest X-ray before. Why do I need another now?

A. X-rays yearly are not too frequent to make certain that tuberculosis has not developed since your last one.

Q. Is the X-ray examination compulsory?

A. No. Attendance is voluntary but good sense and duty to your community should ensure your presence.

Q. Will I get a report on my X-ray?

A. (a) If the film is normal no report is sent.

(b) If the film shows abnormality which is definitely non-tuberculous you will
