W.H. CLIFFORD ADDRESSES SUPERVISORS GROUP

On Tuesday evening last, W.H. Clifford Vice-President (in charge of Finance) of LongLac Pulp and Paper Company Limited and of Kimberly Clark Corporation, addressed the LongLac Supervisors group and presented a most interesting talk on the financial history and growth of Kimberly-Clark and its subsidiaries and affiliates since inception in 1872. A very interesting 35-minute sound film of the operations in all mills and townsites was also shown. From the very enthusiastic reception given Mr. Clifford by the supervisors group, this meeting may be considered one of the most interesting of the Monthly Dinner Meetings yet held.

FIRE SPOILS ALL

If you were to go hunting or fishing around or away from Terrace Bay, you have a particularly personal interest in preventing forest fires, for it is a well-known fact that nothing ruins good hunting and fishing faster than a bush fire. True, the economic prosperity of Terrace Bay depends on the forests. True, too, unemployment and poverty always follow in settlements close to burned-over areas, but let's put those considerations aside for the moment. Let's think only of the effect of fires on sport. Let's remember animals cannot live in burned-out forest land - that fish desert or die in the waters bounded by burned-out forests. The birds all die or vanish in the wake of flames. Let's all decide that we have to do our utmost to protect our forests in or near Terrace Bay from fire; because of their commercial and economic value, yes but also because fire spoils all. When we go hunting, fishing, or just walking in the bush, always remember that smoking in the bush is dangerous, so when you smoke, enjoy it, then be sure your pipe or cigarette is out.

Always remember, fire spoils all.

NOTICE:

An electric belt sander has been misplaced by the Townsite painters somewhere in the townsite within the past month. Would anyone knowing the whereabouts or having information regarding it please contact Don Laporte at the Townsite Office or phone 226. This sander is urgently required to complete the 1952 houses.
