HI-JINKS

Last week one of the annual events of High School Life was held - the initiation of 1st year students.

During the week the students were requested to appear in certain attire which created a great deal of amusement throughout the town. On Friday, Kangaroo Court was held with Richard Marcella as Judge, Laurie Marsh as Prosecuting Attorney and Reg LeBlanc as Defending Lawyer. The Jury consisted of the following people: Terry McInnes, Janice Erickson, Grace Marcotte, Myrna Rhae Gordon, Helen Laundry and Mavis MacFadyen. This was the most trying moment of the whole ordeal for the 9th Graders as it was at this moment they would know what task had been meted out to them by the Senior Students. Knowing from the experience related by students of other years, they were prepared for the worst.

Decisions by the Court: Jimmy Sweet rolled an egg with his nose, from the hill by the bank to the Hudson Bay; Joyce Sitch pushed Jimmy Erickson in a wheelbarrow wherever she was directed to go; John Palmer pushed a barrel wherever he was directed to go by his keeper; Albert Valentino traced his footsteps from Hudson Bay to the theatre with Johnny Boudreau washing them (continued on page 3)

WARDROPE SEES GREAT FUTURE FOR TERRACE BAY

Tuesday night George Wardrope M.P.P. spoke at the Kiwanis ladies night. Guests included his wife Blanche, Marg Storey, Iola Smith, Dave and Tops Locking, Doug Harris and Don and Harriette Porter, and of course all the Kiwanians wives.

Mr. Wardrope painted a glowing picture of Terrace Bay and the surrounding area and its limitless possibilities. He said that Terrace Bay is one of the 17 cities and towns making the Lakehead and the Thunder Bay district great. He quoted statistics to show how the Lakehead is and will continue to be one of Canada's most important industrial and transportation centres.

He told how the Lakehead is now the greatest grain port in the world handling 110 million bushels of grain, how developments in mining at Steep Rock, the natural gas pipeline from Alberta to Montreal and the St. Lawrence Seaway will tremendously increase the Lakehead's growth and importance. He told how the St. Lawrence Seaway will make the Lakehead an ocean port with access to any ocean port in the world saving 5¢ to 7¢ per bushel of wheat.

He also told of watching fully mechanical logging in the woods operations and also lauded Terrace Bay for their progressive policies and development. He stated emphatically that the Trans-Canada highway would be completed with temporary bridges as far as Marathon by next July.
