GIGANTIC MISCALCULATION DISCOVERED IN MEN'S 10 PIN BOWLING LEAGUE

A gigantic miscalculation was uncovered last night in the Men's 10 Pin Bowling league. Due to a burned out tube in the electronic calculator used for figuring the bowling handicaps, 4 average and consequent handicaps were found to be in error and as a result a big upheaval was produced in the standing. Two averages for the Engineers team and two on the Stead and Lindstrom team were found to be in error and the consequence shuffling of points produced the standings below going into the last night of the last series next week.

Standings:

Engineers	34 36	Bears	28 29
Deceivers	29 31	Shift 1	22 25
Warehouse	29 32	Stardusters	20 21
Overheads	28 29	Stead & Lindstrom	18 21

Therefore what looked to be a runaway series for Stead and Lindstrom turns out to be a runaway for the Engineers who again have 1st place money cinched while Stead & Lindstrom

(Cont. on next col.)

GIGANTIC MISCALCULATION (Cont.)

Lindstrom are completely out of the money, similar to last series.

In a meeting this morning with the 10 Pin Bowling Association executive the discrepancy confirmed but to make certain of no comeback the firm of Hiccup, Belch, Barton, Darton and Barton, Registered Accountants, was retained to audit the books and certify that everything is in order.

In the bowling last night the 4 point system again showed its superiority, where going into the last week of bowling all but one team are in the battle for play-off berths. With the Stardusters and Engineers already in from the 1st series all the remaining teams with the exception of Shift #1 are in the thick of the fight for the remaining 2 spots.

Results March 31st.

Borsum 204, Freeman 204 with handicap
