

FIGURE SKATING (Cont.)

Figure skates with their curved blade and teeth at the toe, are the easiest type of skates on which to learn. The curved toe with its teeth may be used as a brake, and will prove to be a distinct advantage even though at first these toes are getting in the way.

Figure skating as you may already know, is the most exacting sport in the world and takes tremendous amount of practice to become a proficient figure skater. It's just like taking piano lessons - you can't expect to become an accomplished pianist overnight. Figure skating might look easy, but believe me it takes many years of diligent and conscientious practice.

So skaters, for the rest of the skating season, let's all work hard, have fun - and see how much each one of you can accomplish.
