

SAFETY STEEPLECHASE

Here are the standings of the six units until midnight, February 27th.

Unit	Points
1. Wood Handling	3180
2. Engineering	3145
3. Townsite	2255
4. Services	1890
5. Pulp Department	1875
6. Technical and Admin. Office	1620

HERE IS AN IMPORTANT NOTE: Everyone is urged to report every accident promptly no matter how slight. There is no penalty for minor cases treated by the Nurse. Only when medical aid is required from a doctor does a case become a Doctor-Care case. On the other hand failure to report even a slight injury can result in a penalty of 15 x the number of people in your unit being levied. That's three times as much as the Doctor-Care Case charge.

Good Housekeeping also plays a major role. During February bonus points for it were earned by:

Pulp Department	-	1000
Wood Handling	-	750
Townsite	-	500

As this is written we are just a quarter way through the Steeplechase Contest. It's still very much any unit's race. Don't be the cause of a penalty to your unit. Play it safe all the time. It doesn't pay to take chances!

LAFF A LITTLE

A man rushed into a bar and asked the bartender if he knew of anything that would stop hiccoughs. The bartender slapped the man across the face with a wet towel.

Surprised and furious the stranger demanded the reason for such action.

With a gracious grin the bartender replied: "Well, you haven't any hiccoughs now, have you?"

"Never did have," was the indignant answer. "I Wanted something for my wife. She's out in the car."
