TO ALL RESIDENTS

Many town residents have already realized that dandelions are taking hold in several areas in town and have started to combat them. The cooperation of everyone is needed to keep this wee under control. The most effective method of control is the use of the wee killer, 2, 4-D. Also, the spreading of dandelions can be prevented if everyone will cut out the plant in his yard and around his yard before the flowers turn white in the seeding process. Everyone, please assist in controlling this plant.
