SNOW REMOVAL EQUIPMENT

Parents in the town are asked to alert their children to the snow removal equipment which is operating frequently in the town.

The snow banks are high in all areas cutting down the driver's visibility, so that all children are asked to be especially careful in the garage compounds. When you see or hear any of this equipment, be alert, keep away from it, and above all let's not have any horseplay around such equipment.

HOME AND SCHOOL ASSOCIATION REGULAR MEETING January 21st, 1957

Have YOU attended a meeting of the Terrace Bay Home and School Association lately? There are some who think this Association deals only with problems concerning the education of our young. We do endeavour to deal with this very important subject, but the fallacy of this impression is clearly demonstrated in the program arranged for the next meeting of the Association which will be held on Monday, January 21st, at 8.15 P.M. in the Public School. This program will deal with a subject which should be of great interest to everyone in Terrace Bay.

The First speaker will be Mr. H. C. Laundy who will outline the history and formation of Terrace Bay into an Improvement District. This form of local government, together with current problems and projects, will be explained in an address by Mr. C. E. Paget.

A discussion period will follow so if you are interested in knowing how and why our local Board has the civic powers it now exercises, here is your chance. Everybody welcome!
