CENOTAPH MEMORIAL

At a meeting of the Cenotaph Committee held recently, with Mr. Alf. Barbini in attendance, complete and final plans were drawn up which assure immediate start on the erection of the Cenotaph.

Al Harrison is putting the finishing touches to the blueprints for the foundation itself, which will be an 8' x 8' x 8" concrete slab resting on five 12" concrete piers encased in transite pipe. This will be put in at ground level and actual construction of this foundation slab will get underway early in July.

Bill Baillie has volunteered to mastermind the entire job. (Bear this in mind all ex-veterans, particularly, as much more volunteer labour will be required).

In the meantime Alf. Barbini will proceed with the Cenotaph cutting and construction. As previously announced this will be in the form of a traditional Flanders Cross mounted on two symmetrical bases of 12" thickness. Stone to be used is Indiana Limestone and treated with a weather-resistant Silicone treatment. A Sword in Gold Leaf will be etched into the tree of the Cross. A Bronze Plaque, 10" x 20" will be fitted into the front upper base of the Cenotaph, which will be suitably inscribed.
