LIBRARY REVIEW

Doctor Pygmalion - Maxwell Maltz, M.D.

This is the autobiography of a plastic surgeon. Drawn from the author's more than twenty-five years experience in remaking faces and bodies - the young and the old, the ugly and the almost beautiful, the rich and the poor, the famous and the unknown. This narrative has an Arabian Nights fascination in the sheer variety and strangeness of the tales it tells. Many doctors have told their stories but here, for the first time, a practicing plastic surgeon takes the reader behind the scenes into his life and the lives of his patients.

Library Hours:

Monday and Wednesday afternoons -
2:30 to 4:30
Tuesday, Thursday & Friday evenings -
7 to 9.

CREDIT UNION

Continuing a series of questions most often asked about credit unions:

Q. How much should you save?

A. There's no proven formula. It's different for everyone, but here are a few proven ideas.

* Save enough! Save till it "hurts" a little, because it's worth it. Even at \$5 a week, you'll have almost \$3,000 in 10 years.

* Save a set amount -- and do it regularly.

How to do it:

* Save every pay day -- as soon as you cash your check. Payroll deduction of course makes it easier.

* Add another dollar to your regular pay day amount whenever you can.

(cont'd next col.)

- * Borrow when you need cash. Don't break up your share account.
- * Save while you repay a loan; with every payment, a share payment.
