Details about some of these activities appear in this week's issue of the News or have appeared in former issues recently. And perhaps we have omitted some other accomplishments which people in Terrace Bay have participated in.

These accomplishments add up to a lot of work and effort by a lot of individuals and the people concerned deserve a lot of credit in bringing recognition to the town and the people of Terrace Bay.

LANDS & FORESTS

The Department of Lands and Forests has on its staff at the present time 45 trained biologists--the largest of such technical staffs in Canada. The biological staff in 1946 was two. In addition, the Department has trained a number of biologists who have joined other departments or agencies that co-operate with Lands and Forests in biological problems.

The biologists are engaged in all types of Department work--administrative, park activities, fish and game management and research in all aspects of fish and game work.
