Class B - elementary school children
over 9 years;
Class C - open to secondary school
students only.

A Grand Prize, a miniature trophy,
will go to the final choice of the judges.
This show becomes more popular every year
both with contestants and with patrons.
This year's show is shaping up to be the
best yet.

Direct all enquiries to Bill Sernesky -
phone 3673, Terrace Bay.

SCHOLARSHIP ANNOUNCEMENT

The Ontario State Council of the
Knights of Columbus announced recently they
are awarding two \$500.00 scholarships
annually to Catholic students graduating
from Ontario High Schools. Successful
applicants will receive the scholarships
yearly as long as they attend university
and as long as their work is up to standard.

Local applications will be processed
by the Scholarship Committee of St. Edward's
Council.

AMATEUR SHOW - MAY 3RD

St. Edward's Council of the Knights
of Columbus are sponsoring their 4th
Annual Amateur Show on Saturday, May 3rd,
in the Terrace Bay High School Auditorium.

All students, both High School and
Grade School from Schreiber, Terrace Bay,
Marathon, Heron Bay and Rosspoint are
eligible to enter. Entry blanks are in
the hands of district teachers. Prospective
contestants should get their entries in as
soon as possible.

Three prizes will be awarded in each
of three classes:

Class A - elementary school children
9 years and under;

(cont'd next col.)

TELEVISION SAFETY - Submitted by the Terrace
Bay Fire Department.
Source - National Board of Fire Underwriters.

The Picture Tube - used in television
receivers is a highly evacuated bulb with
a glass face and metal or glass walls and
is continually being stressed with a large
crushing force. An atmospheric pressure of
14.7 pounds is exerted on each square inch
of tube surface. When the tube breaks it
implodes in a violent manner, resulting in
broken glass flying in random directions
and possibly through the television protect-
ive window. When a picture tube becomes
defective, replacement should not be attempt-
ed by the user. A warning on all television
receivers listed by Underwriters' Laboratories,
Inc. reads "High Vacuum Picture Tube is
Dangerous to Handle. Refer Servicing to
Qualified Service Personnel."

Television receivers should never be
placed on a radiator or other source of
heat as some parts of a set might be
damaged by continued exposure to tempera-
tures encountered under such conditions.

TV sets generate considerable heat
which accumulates dangerously when ventila-
tion is cut off. Care should therefore be
taken to see that the ventilating openings
are kept clear and open. It may be dangerous,
for instance, to install a set in a tight
cubicle unless it was especially manufactured
for such a confined space.

Receivers should not be left turned on
while unattended. Because of the inherent
hazard of electric shock, particular care
must be exercised in using a television
receiver outdoors.
