

Doctor Drew-Brook Busy with Dental Practice

Doctor Bob Drew-Brook, the new dentist in Terrace Bay is a busy man catching up on the dental requirements of the people in Terrace Bay. He has been set up for business for about a month.

The Doctor and his wife Betty hail from the city of Toronto. They live at 547 Lakeview Drive, and have a son Alan who is one year old.

Doctor Drew-Brook is a graduate of the University of Toronto Dental College. Prior to coming to Terrace Bay he worked for about three years for the Ontario Department of Public Health at his profession. We understand he likes the outdoors, being partial to fishing, boating and camping.

We extend a warm welcome to Doctor Drew-Brook and his family to Terrace Bay. We hope that he and his family will be as pleased with Terrace Bay as the people of Terrace Bay are pleased to have a dentist in the community.

Now working with the Doctor is Rosalind Savoy, who is no stranger to Terrace Bay. Rosalind has been working out at Hinton, Alberta and gained experience out there working for a dentist.

If you require dental work you now just have to pick up the phone and dial 3734 for an appointment.

Forest Fires Finish Fishing

- Why? Forest protection officers give this explanation:

"When large areas around a lake are burned off, there is nothing left to hold the rainfall and most of it runs off into the lake. This runoff erodes the soil and carries not only the top soil but also the ashes into the water.

This sediment, and the lye which leaches out of the ash, make the water intolerable for many of our game fish and, as a result, the fishing is ruined for many years.

Everyone is asked to keep this important point in mind and 'Be Sure to Drown your Campfire before you Leave!'"
