UTILITIES COMMISSION ISSUES A CAUTION.

Residents of Terrace Bay are cautioned by the Utilities Commission to check the wiring of their houses before buying Dryer machines having more than 6000 watt capacity. The majority of houses are wired for units of this size and they can be safely installed with no change of wiring. Units over 6000 watt capacity require revisions to wiring in most homes, cost of which must be borne by the tenant or owner.

If in doubt as to the capacity of your wiring you are advised to contact D. Boudreau before purchasing equipment.
